- *Some events may not be material individually but may be found material collectively.*

- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material at present but may be having material impact in future.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS

Business Specific/ Company specific Risk

1. ***Inadequate or interrupted supply and price fluctuation of packaging materials could adversely affect our business, results of operations, cash flows, profitability and financial condition.***

Our company engages in the distribution of various plastic-based products such as Biaxially Oriented Polypropylene (BOPP) film, Polyester Films, Cast Polypropylene (CPP) films, Plastic granules, Inks, Adhesives, Masterbatches, Ethyl Acedate, and Titanium Dioxide. We offer customized bulk packaging solutions to business-to-business (B2B) manufacturers in a variety of industries.

The quantity and cost of our products are dependent on our ability to source those products and packaging materials at acceptable prices and maintain a stable and sufficient supply of the same. The products we use are subject to price volatility and unavailability caused by external conditions, such as commodity price fluctuations within India and globally, weather conditions, supply & demand dynamics, logistics, our bargaining power with the suppliers, inflation and governmental regulations and policies.

We generally pass on the cost escalations to our customers, however, we may not be able to pass on every instance of escalation in input costs and may have to pursue internal cost control measures or may have to absorb in some instances. If we are not able to effectively pass on our escalated costs to customers, such price escalations could have a material adverse impact on the results of operations, financial condition and cash flows.

2. ***We are highly dependent upon a limited number of suppliers. 76.32%, 80.74% and 74.79% of our Total Purchases are derived from our top 5 suppliers for the period ended on September 30, 2023, and for the Fiscal Years ended on March 31, 2023, 2022 and 2021.***

We source our products requirement indigenously or through imports. Purchases made from our largest supplier, top 5 suppliers and top 10 suppliers for the period ended on September 30, 2023, and for the Fiscals Years 2023, 2022 and 2021 are as follows:

(Rs. in Lakhs)

Particulars	For the period ended on		For the Fiscal Year ended on					
	September 30, 2023		March 31, 2023		March 31, 2022		March 31, 2021	
	Amount	% of Total Purchases	Amount	% of Total Purchases	Amount	% of Total Purchases	Amount	% of Total Purchases
Largest Supplier	1,136.17	23.35%	4,998.81	35.66%	4,491.78	28.31%	2,540.80	27.50%
Top Suppliers ⁵	3091.29	63.53%	10,699.44	76.32%	12,246.92	77.18%	6,909.49	74.79%
Top Suppliers ¹⁰	3946.28	81.51%	12,105.40	86.36%	14,193.16	89.44%	7,970.50	86.28%

While we may find additional suppliers to supply these products, any failure of our suppliers to deliver these products in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time and at the desired level of quality.

As a result, we may lose customers which could have a material adverse effect on our business, financial condition, and results of operations. Further our product supply and pricing may become volatile due to several factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure that we will be able to procure adequate supplies of our products in the future, as and when we need them on commercially acceptable terms. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

3. We have entered into Del Credere Associate (DCA) Agreement and Del Credere Associate Operated Polymers Warehouse (DOPW) Agreement with Indian Oil Corporation Ltd. ("IOCL"). Termination or non-renewal of the Agreement or any material modification to the existing terms under such agreement adverse to our interest will materially and adversely affect our ability to continue our business and operations and our future financial performance.

We have entered into long-term agreements for plastic/ polymer granules mainly HDPE, LLDPE, PP as Del-credere Agent of Indian Oil Corporation Limited (IOCL). We have first entered into an agreement with IOCL as DCA and DOPW operator in year 2017 which has been lastly renewed on June 26, 2023, whereby we have been appointed as Del Credere Associates for prompt payments to IOCL against sale of products by IOCL to its customers. Pursuant to the said arrangements, we have also been granted the right to market and sell to customers on behalf of IOCL with the objective inter alia, of receiving and storing the products. Pursuant to the agreement, we are entitled to receive commission on any such sales made through us, however in case of default on payment by such parties, IOCL has the right to recover the amount from us with interest for overdue period.

Further, any suspension, restriction or termination of the agreement by IOCL could adversely affect our operating results and financial condition. In the event IOCL exercises their right to terminate the agreement whether on the occurrence of any event mentioned in the Agreement or otherwise, or, on expiry of the term of the agreement, or in the event that they are unwilling to renew the agreement or impose terms which are less favorable to us than existing terms, it may materially and adversely affect our business operations and our future financial performance.

4. ***Our Company requires significant amounts of working capital and 82.11%, 82.05%, 90.51% and 90.42% of our current assets comprises of trade receivables and inventories for the period ended on September 30, 2023, and for the Fiscal Year ended on March 31, 2023, 2022 and 2021. Our inability to meet our working capital requirements including failure to realize receivables and inventories may have an adverse effect on our results of operations and overall business.***

Our business requires significant working capital, such as financing the purchase of our products, and payments for operating expenses before we receive payment from our customers. In addition, the actual amount of our future capital requirements may differ from estimates as a result, among other factors, cost overruns, unanticipated expenses, regulatory changes, economic conditions, additional market developments and new opportunities in the industry. A significant portion of our working capital is consumed in trade receivables and inventories. Summary of our working capital position is given below:

Pursuant to the certificate dated **February 05, 2024**, issued by our statutory auditor M/s. Keyur Shah & Associates, chartered accountants.

We have to maintain adequate inventories of our products to meet our day-to-day requirements and avoid situations like stock outs. The result of our operations depends upon our ability to manage our inventories. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and trade inventory accordingly. If our management misjudges expected customer demand, it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows, liquidity and overall business.

We intend to continue to grow our business operations by expanding capacities of our existing products and introducing new products. The Objects of the Issue include, amongst others, funding the working capital requirement of our business. In order to sell new products, we might have to maintain a higher level of inventories and may also have to offer liberal credit terms to our customers to establish the demand and market for the newer / wider range of products. This

may result in further increase in the quantum of working capital particularly trade receivables and inventories. Our inability to maintain sufficient cash flows, realize existing inventories & trade receivables, maintain credit facility and other sources of fund, in a timely manner, or at all, to meet the increasing requirement of working capital may have significant adverse effect on our financial condition and result of our operations. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 113.

5. *The introduction of alternative packaging materials caused by changes in technology or consumer preferences may affect demand for our existing products, which may adversely affect our financial results and business prospects.*

Our products are used mainly by companies who require packaging materials for FMCG, chemical, Food Products, Textiles, Pesticides, Fertilizers, Ceramics, etc. Our business is affected by changes in technology, consumer preferences, market perception of brand, attractiveness, convenience, safety and environmental norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers’ businesses and, in turn, will affect the demand for our products. Any failure to forecast and/or meet the changing demands of packaging businesses and consumer preferences may have an adverse effect on our business, profitability and growth prospects.

6. *We derive a portion of our revenue from certain customers, and the loss of one or more such customers, the deterioration of their financial condition or prospects, or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on a limited number of customers for a significant portion of our revenues. Revenues generated from sales to our top 10 customers was Rs. 2,058.28 lakhs, Rs. 5881.51 lakhs, Rs. 6281.10 lakhs and Rs. 3806.64 lakhs which represented 37.45%, 37.45 %, 36.73 % and 37.23 % of our revenue from operations for the period ended on September 30, 2023, and during the Fiscal 2023, Fiscal 2022 and Fiscal 2021 respectively. However, the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. While we have developed valued relationships with certain of our customers in the normal course of business, there can be no assurance that our customers in the past or our newly acquired customers will continue to place similar orders with us in the future. The loss of one or more of these significant customers or a significant decrease in business from any such key customer, whether due to circumstances specific to such customer or adverse market conditions affecting the industry in which our customer operates or the economic environment, may materially and adversely affect our business, results of operations and financial condition.

Our reliance on a select group of customers may also constrain our ability to negotiate our arrangements, which may have an impact on our profit margins and financial performance. The deterioration of the financial condition or business prospects of these customers could reduce their requirement for our products and result in a significant decrease in the revenues we derive from these customers. The loss of one or more of our significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition, and cash flows.

7. *Our Group Companies Purv Films Private limited, Apex Flexipack Private Limited, Millenium Plastipack Private Limited, Purv Ecoplast Private limited, Purv Packaging Private limited and our Subsidiary Company Cool Caps Industries Limited, is carrying on business activities similar*

to our business. This may be a potential source of conflict of interest for us and which may have an adverse effect on our business, financial conditions, and results of operations.

We, our Promoter and our Promoter Group entities are a part of the Purv Group and our Company and some of our Promoter Group entities, Purv Films Private limited, Apex Flexipack Private Limited, Millenium Plastipack Private Limited, Purv Ecoplast Private limited, Purv Packaging Private limited and Cool Caps Industries Limited have common pursuits, i.e. carrying on business activities similar to our business. We have no agreements with our Promoter or any other Group entities that restricts us or them from offering similar products and services. As a result, our relationship with our Promoter and other entities forming a part of the Purv Group may cause certain conflicts of interest and we may compete with one or more of our Promoter Group entities while undertaking our businesses in the future. We may also compete with our Promoter Group entities for the services of our business partners and other suppliers.

We cannot assure you that we will be able to successfully compete with such Promoter Group entities, if and when such conflict arises. Further, our relationship with Promoter and our Promoter Group entities may effectively prevent us from taking advantage of certain business opportunities. For instance, Purv Group may, select a Promoter Group entity instead of us to pursue certain business opportunities that arise within the Purv Group. If we forego certain business opportunities because of our relationship with our Promoter or the Promoter Group, it could adversely affect our reputation, business, financial condition and results of operations.

- 8. There is an increased awareness towards controlling pollution and many economies including India have joined in the efforts to ban plastic product. In case any plastic packaging products traded by us are banned in India, it could have a material and adverse effect on our business and results of operations.***

Plastic takes many years to decompose and is very dangerous for living beings. Many countries around the world are finding alternatives to the use of plastic products. In this regard, Government has enacted Plastic Waste Management Rules, 2016 for recycling of plastic products and introduced the Extended Producer Responsibility (EPR).

Our Company cannot be assured that future measures will not have a negative impact on our business. If the Government of India legislates against the use of plastic products or if regulations for the traders and use of our packaging products are made more stringent, it could have a material and adverse effect on our business and results of operations.

- 9. There are pending litigations against our company, our Promoters, our Directors and our Group Companies and any adverse decision in these proceedings may render us/them liable to liabilities/penalties and may adversely affect our business, result of operations and financial conditions.***

Our Company, our Promoters, our Directors and our Group Companies are involved in certain legal proceedings at different levels of adjudication before various courts, tribunals and appellate authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties by other statutory authorities, our Company, Promoters, Directors and Group Companies may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities and also adversely affect our reputation.

In the ordinary course of business, our Company, Promoters, our directors and our Group Companies are involved in certain legal proceedings, which are pending at varying levels of adjudication at different forums. The summary of outstanding matters set out below includes details of civil proceedings, criminal proceedings, tax proceedings, statutory and regulatory

actions and other material pending litigation involving our company, directors, promoters and group companies of our Company.

According to the materiality policy, any outstanding litigation, other than criminal proceedings, statutory or regulatory actions and taxation matters, is considered material if the monetary amount of claim by or against the entity or person in any such pending matter is in excess of Rs. 5,00,000/- (Rupees Five Lakh only) or if an adverse outcome of any such litigation could materially and adversely affect our business, prospects, operations, financial position or reputation.

We cannot assure that any of the legal proceedings described below will be decided in favor of the company, Promoters, Directors or our Group Companies respectively. Further the amounts claimed in these proceedings have been disclosed to the extent ascertainable, excluding contingent liabilities and include amounts claimed jointly and severally. Should any new developments arise, such as change in Indian law or rulings by appellate courts or tribunals, additional provisions may need to be made by us, the promoters, group companies and directors in our respective financial statements, which may adversely affect our business, financial condition and reputation. We may incur significant expenses and management time in such legal proceedings. Decision in any such proceedings adverse to our interests may have adverse effect on our business, future financial performance, and results of operations.

Decision of such proceedings which are against the interests may affect our reputation and may have material and adverse effect on our business, results of operations and financial condition are as under:

*Outstanding material civil litigation in respect of title suit no. 1083/2022 is in respect of the permanent injunction filed before the learned civil judge (junior division), first court-Howrah and it is in respect of immovable property hence the value cannot be ascertained or quantified.

**The litigations, inter alia M.Ex.06/2019, Title Suit 1083/2022 and Misc Case 56/2022, are in respect of our two Group Companies namely Purv Films Private Limited and Airborne Technologies Private Limited are pending in Howrah Court of Judicature, West Bengal where the Bengal Investment Limited is another party to the litigation.

#As per notice dated 13.02.2023 the demand amounting to Rs. 1,96,71,865/- is in relation with ITC available as per GSTR-2A and ITC claimed in GSTR-3B for the period April 2022 to September 2022. The company has submitted the reconciliation of the mismatch on 23.02.2023 and is of the view that the demand is not maintainable after reconciliation, but the case is reported as department has not passed any order yet in favour of the company.

In the case of Cool Caps Industries Private Limited, in the AY 2022-23, there are mismatches in the disallowed expenses as per Form 3CD and ITR filed. The Assessing Officer has made additions in the income amounting to Rs. 2,97,450/-, however, amount of demand is not yet quantified.

In the case of Purv Ecoplast Private Limited, in respect of period November 2020 to September 2022, GST department has initiated verification with respect to ITC available as per GSTR-2A and ITC claimed in GSTR-3B. However, amount of demand is not yet quantified. In case of Cool Caps Industries Limited, in respect of period July 2017 to March 2022, GST department has initiated an audit under Section 65 of the CGST Act, 2017. Total liability proposed under audit memo dated 06.12.2023 is Rs. 17,49,627/-, however the said demand has not yet been finalised vide issuance of Form GST ADT-02 as per GST Law.

In the continuation of litigation matters, Bengal Investment Limited was awarded an arbitral award dated July 25, 2018, entitling them to receive the disputed rent of Rs. 11,18,576, along with costs associated with the award amounting to Rs. 3,00,000, totaling to Rs 14,18,576 from our Group Company, Airborne Technologies Private Limited. Bengal Investment Limited filed the petition no. M. Ex-06/2019 with the Learned Civil Judge Senior Division, Howrah on January 25, 2019, under Order 21, Rule 10 of the Code of Civil Procedure, 1908, to invoke execution proceedings against our Group Company, Airborne Technologies Private Limited for the said arbitral award. On January 21, 2022, Bengal Investment Limited filed an interlocutory application within the main application seeking attachment of movable and immovable property owned by our Group Company, Airborne Technologies Private Limited. An order for execution of the attachment was obtained on May 6, 2022. However, the immovable properties subject to the execution proceedings in M. Ex. 06/2019 were already transferred to our other Group Company, Purv Films Private Limited on October 20th, 2020, and registered on February 25, 2021.

Therefore, Purv Films Private Limited approached the Learned Civil Judge Junior Division, Howrah via application number 1083/2022 dated August 4, 2022, to safeguard its rights, title, or interest in the properties in question. They filed a title suit for permanent injunction and sought an ad interim injunction from the Learned Civil Judge Junior Division, Howrah. This matter is still pending in court and is scheduled to be heard on April 08, 2024. Purv Films Private Limited has also filed a Miscellaneous Application having case number 56 of 2022 in the ongoing execution proceedings in M. Ex. 06/2019 which aims to raise complaints and questions the right, title, or interest of the properties subject to attachment in the execution proceedings. This matter is still pending in court and is scheduled to be heard on February 20, 2024.

10. We have not entered into any long-term or definitive agreements with all our customers. If our customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.

We have not entered into any long-term or definitive agreements with our customers and instead rely on purchase orders to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalization, and such an amendment or cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Our customers do not, typically, place firm purchase orders until a short time before the products are required from us as a result of which, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production or sales. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers’ vendor preferences.

Additionally, our customers have standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers’ expectations could result in the cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition.

11. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact on the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory, we may be required to write down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of our products and local transportation. Should our supply of products be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such a disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which

could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we understock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

12. Our Company and its subsidiaries have availed unsecured loans from promoter, directors and group entities, which may be recalled on demand.

For the period ended on September 30, 2023, and for the financial year ending March 31, 2023, March 31, 2022, and March 31, 2021, our Company and subsidiary companies have outstanding unsecured loans as under:

<i>(Rs. in Lakhs)</i>					
S. No.	Name of Company	September 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
1	Purv Flexipack Limited	375.52	499.72	195.64	167.14
2	Cool Caps Industries Limited (including its subsidiaries)	390.50	426.76	10.00	94.24

These loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, our Company may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favorable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer the chapter titled "**Financial Statements as Restated**" beginning on page 238.

13. We are required to maintain certain licenses, approvals, registrations, consents and permits in the ordinary course of business. Failure to obtain the requisite approvals result in non-compliance and therefore, affect our business operations, financial condition, result of operations and prospects.

We require a number of licenses, approvals, registrations, consents and permits to operate our business in India. As we expand our operations and enter new markets, we may not be familiar with local regulations and may need to incur additional costs to ensure regulatory compliance. In addition, we may need to apply for approvals, including the renewal of approvals which may expire, from time to time, as and when required in the ordinary course of business.

Our material subsidiary company Cool Caps Industries Limited yet to apply for Registration under the Assam Shops and Establishments Act, 1971 as a Commercial Establishment for the address - Patta no 46, Paschim Banbhag, Jabjabkuchi, Barajol, Dag no 161, Ghograpar, Nalbari, Assam.

If we are unable to obtain such approvals and permits, our business, results of operations, cash flows and financial condition could be adversely affected. If we fail to obtain, maintain or renew such licenses, approvals, registrations, and permits in a timely manner, it may result in interruption of our business operations, which could have an adverse effect on our business, financial condition and results of operations. While we have obtained key approvals required for our business, we have also applied for, and are awaiting grant/ renewal of certain key approvals.

Furthermore, government approvals and licenses are subject to numerous conditions, including adherence to emission standards and regular monitoring and compliance requirements, some of which are onerous and require us to incur substantial expenditure. We may incur substantial costs, including clean up and/or remediation costs, fines and civil or criminal sanctions, as a result of violations of or liabilities under environmental or health and safety laws, which may have a material adverse effect on our business or financial condition. We cannot assure you that approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for, obtain and validly maintain the required licenses, approvals, registrations or permits, or any suspension or revocation of any approvals, licenses, registrations and permits that have been or may be issued to us, may materially and adversely affect our operations. For further details, please see the section entitled **“Government and Statutory Approvals”** on page 373 for more details, including such approvals for which applications are pending before relevant authorities.

14. *We are not directly subject to quality requirements however any product defect issues or failure by the manufacturer to comply with quality standards may lead to the cancellation of existing and future orders placed to us, recalls and exposure to potential product liability claims.*

We face a business risk of losing potential customers due to product defects by the brands and manufacturers whose products we supply. The subsequent liability claims, if the use of any of the products offered by us results in personal injury or property damage. Our suppliers may not be able to meet regulatory and quality standards in India, or the quality standards imposed by our customers, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of the products offered by us do not meet regulatory standards or are defective, we may be, inter alia, (i) responsible at the instance for damages relating to any defective products, or (ii) required to replace, recall or redesign such products.

The failure by us or any of our suppliers to achieve or maintain compliance with regulatory requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. The quality of products will have an impact on our company and in turn affect our brand image, business and revenue. There is no assurance that the products we supply will always meet the satisfaction of our customers’ quality standards. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able locate new suppliers in compliance with regulatory requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue.

15. *Ability to expand the customer base and develop new products and generate new sales.*

Customer relationships are the core of our business. Our ability to grow our customer base and drive market adoption of our products is affected by the pace at which the demand of our products grows. We expect that our revenue growth will be primarily driven by the pace of adoption of our offerings. This will drive our ability to acquire new customers and increase sales to existing customers, which in turn, will affect our future financial performance.

We have grown our operations by introducing quality products to meet the potential requirements of our customers and create market for our products. To service and grow our relationships with our existing customers and to win new customers, we are required to provide them with products that address their quality and other requirements, to anticipate and

understand trends in their relevant markets and to continually address their needs as those change and evolve.

Our future growth shall depend on our ability to identify emerging market trends, offer new products to customers, inculcate strong culture of innovation, have trained workforce and latest research and development facilities to enable us to expand the range of our offerings to customers and improve the delivery of our products along with growing our portfolio of various products to increasingly represent our revenue from operations, widened the customer base that we cater to, and typically have a higher margin profile.

16. Our lenders have charge over our movable and immovable properties in respect of finance availed by us. Our inability to meet our obligations under our debt financing arrangements could adversely affect our business, results of operations and cash flows.

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable and immovable properties. The total amounts outstanding and payable by us as secured loans for the period ended on September 30, 2023, were Rs. 5,927.07 lakhs. For further details, please refer to, the chapter titled **“Financial Statements as Restated”** beginning on page 238.

In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to Invocation/forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. Any failure on our part to comply with the terms in our loan agreements would generally result in events of default under these loan agreements. In such a case, the lenders under each of these respective loan agreements may, at their discretion, accelerate payment and declare the entire outstanding amounts under these loans due and payable, and in certain instances, enforce their security which has been constituted over our various assets and take possession of those assets, which could adversely affect our liquidity and materially and adversely affect our business and operations.

17. Our Company had a negative cash flow from our operating, investing and financing activities in past three years, details of which are given below, sustained negative cash flow could impact our growth and business.

Our Company had a negative cash flow from our operating, investing and financing activities in the previous year(s) as per the Restated Consolidated Financial Statements and the same has been summarized below:

Particulars	For the period ended on September 30, 2023	For The Year Ended March 31,		
		2023	2022	2021
Cash Flow from/ (Used in) Operating Activities	(1,204.86)	2,262.22	(110.89)	(589.52)
Cash Flow from/ (Used in) Investing Activities	(852.57)	(3,846.70)	(699.06)	(714.61)
Cash Flow from/ (Used in) Financing Activities	2,174.34	1,512.81	883.46	1,023.82

Cash Flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Cash flows from our Operating activities are positive since last one year as per Restated Financial Statements. However, if we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

18. There may have been certain instances of non-compliance and alleged non-compliance with respect to certain regulatory filings for corporate actions taken by our Company in the past.

Consequently, we may be subject to regulatory actions and penalties for any such past or future non-compliance and our business, financial condition and reputation may be adversely affected.

Our Company has not complied with certain statutory provisions such as the following:

There were instances of delayed filing of statutory forms under the Companies Act with the Registrar of Companies (RoC), which were subsequently rectified by paying additional fees. These delays occurred due to inadvertent reasons and ranged from 1 to 1704 days. The details of such delays are as follows:

As of now, our Company has not received any notice from ROC w.r.t. non-compliance, we cannot assure that no notice will be issued by ROC or no penalty will be imposed in this regard in the

future. Other non-compliance in late filing of Forms with ROC has been rectified these errors by filing the updated forms and payment of requisite additional fees. However, there is no assurance that such discrepancies will not occur in the future, and we may be subject to regulatory actions and penalties, which could adversely affect our business operations and financial position.

19. Our previous Statutory Auditor K.S. Bothra & Co. have included auditor qualification relating to the depreciation on Land & Building and Ownership Flats was not charged as per note 2(f)(ii)(b) of Significant Accounting Policies for the financial year ended March 31, 2022 and March 31, 2021 in the audit reports of our Company.

Our previous Statutory Auditor, K.S. Bothra & Co., issued auditor qualifications related to the depreciation on Land & Building and Ownership Flats, as disclosed in note 2(f)(ii)(b) of the Significant Accounting Policies, for the financial years ending March 31, 2022, and March 31, 2021, in the audit reports of our Company.

The audit reports for the Financial Years 2022 and 2021 contain qualifications from our previous statutory auditor regarding the failure to charge depreciation on certain assets categorized under the Fixed Assets Group. These qualifications specifically noted that **"The group has not provided depreciation on Land & Building and Ownership Flats as per note 2(f)(ii)(b) of Significant Accounting Policies."**

The rationale behind not applying depreciation to these assets is rooted in the fact that they were acquired for investment and resale purposes and were not intended for direct business use. These assets were erroneously classified under the Fixed Assets Group. However, during the restatement of our financials for the purpose of the IPO, we addressed these qualifications under the guidance of our Peer Review auditor. Subsequently, we reclassified these assets under the Investment category, as they do not serve a business purpose and depreciation should not be charged to the Profit and Loss Account due to their status as non-business purpose assets (Investment Assets).

Consequently, in the Restated Financial Statements, these assets have been reclassified in accordance with Accounting Standard 13, "Accounting for Investments." The Peer Review auditor altered their categorization from fixed assets (Annexure No -13) to Investment property (Annexure No- 17) for the financial years ending March 31, 2022, and March 31, 2021.

Further, there can be no assurance that any similar qualifications will not form part of the audit reports on our financial statements for future fiscal periods, or that such qualifications will not affect our financial results in future fiscal periods. Investors should consider these qualifications in evaluating our financial condition, results of operations and cash flows. Any such qualifications on our financial statements in the future may also adversely affect the trading price of the Equity Shares.

20. The industry segments in which we operate being fragmented, and we face competition from other large and small players, which may affect our business operations and financial conditions.

We compete in flexible packaging and plastic industry on the basis of the quality of our products, price, and customer satisfaction. The industry in which we operate is highly competitive. Factors affecting our competitive success include, amongst other things, price, demand for our products, and reliability. Our competitors vary in size, and may have greater financial, marketing, personnel and other resources than us and certain of our competitors have a longer history of established businesses and reputations in the Indian trading and packaging industry as compared with us. Competitive conditions in some of our segments have caused us to incur lower net selling prices

and reduced gross margins and net earnings. These conditions may continue indefinitely. Changes in the identity, ownership structure, and strategic goals of our competitors and the emergence of new competitors in our target markets may impact our financial performance. Our failure to compete effectively, including any delay in responding to changes in the industry and market, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability. The industry and markets for our products are characterized by factors such as the development of new products, and evolving industry standards.

For more information, also refer to chapter ***“Our Business”*** on page 167.

21. Our Company’s failure to maintain the quality standards of the products or keep pace with the technological developments could adversely impact our business, results of operations and financial condition.

Our products depend on the customer’s expectations and choice or demand of the customer as we trade as per particular customer’s needs. Any failure to maintain the quality standards may affect our business. Although we place order as per customer quality requirement, we cannot assure that the products will always be able to satisfy our customers’ quality standards. Any negative publicity regarding our Company, or line of business, including those arising from any deterioration in quality of the products we trade from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customers’ expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition.

While, we believe that we have always expanded our capacities and/or introduced new products based on latest technology to cater to the growing demand of our customers and also endeavour regularly update our existing technology and acquire or develop new technologies on a continuous basis, our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

22. The orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations. Further any defaults or delays in payment by a significant portion of our customers, may have an adverse effect on cash flows, results of operations and financial condition.

We may encounter problems in executing the orders in relation to our products or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay the amounts owed.

In the ordinary course of business, we extend credit to our customers. Consequently, we are exposed to the risk of uncertainty regarding the receipt of the outstanding amounts. As on the period ended September 30, 2023, and as of March 31, 2023, March 31, 2022, and March 31, 2021, our trade receivables were Rs. 7,065.96 lakhs, Rs. 6,258.22 lakhs, Rs. 5,242.66 lakhs and Rs. 4,859.69 lakhs respectively. Our results of operations and profitability depend on the

creditworthiness of our customers. Some of these customers may have weak credit histories and we cannot assure them that these counterparties will always be able to pay us in a timely manner, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us.

23. Any increase in interest rates would have an adverse effect our results of operations and will expose our Company to interest rate risks.

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Our secured debt has been availed at floating rates of interest. Any fluctuations in interest rates may directly impact the interest costs of such loans and in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled **“Financial Indebtedness”** beginning on page 361.

24. We have certain contingent liabilities that have not been provided for in our Company’s financials which if materialised, could adversely affect our financial condition.

Our contingent liabilities as per Restated Standalone Financial Statements as on September 30, 2023, are as under:

		<i>(Rs. in lakhs)</i>
Particulars	Amount	
(1) Contingent liabilities		
(a) Guarantees issued by banks	1,105.78	
(b) Income tax Matters	-	
(c) Indirect tax Matters	11.86	
(d) Corporate Guarantee Given by Company	7,538.93	
Total	8,656.57	
(2) Commitments		(166.00)

In the event any such contingencies mentioned above were to materialize or if our contingent liabilities were to increase in the future, our financial condition could be adversely affected. For further details, see the section entitled **“Financial Statements as Restated”** on page 238.

25. We do not own three warehouses used for our business. In the event, we are unable to renew the lease/rent agreements, or if such agreements are terminated, we may suffer a disruption in our operations.

We have taken the following warehouses on lease of varying tenures as under:

S. No.	Location	Utility	Document Date	Lessor	Monthly Rent	Period
1.	(i) Dag No.636 of K. P. Patta No.39 of village Maidam of Beltola Mouza, Dist. Kamrup (Metro), Guwahati, Assam (3500 sq. ft.)	Warehouse	April 01, 2023	Eastern Agro Processing & Tea Warehousing Cooperative Society Ltd.	Rs. 66,500	01.04.2023 to 28.02.2024
	(ii) Dag No.636 of K. P. Patta No.39 of village Maidam of Beltola Mouza, Dist.	Warehouse	April 01, 2023	Eastern Agro Processing & Tea Warehousing	Rs. 60,800	01.04.2023 to 28.02.2024

S. No.	Location	Utility	Document Date	Lessor	Monthly Rent	Period
	Kamrup (Metro), Guwahati, Assam (3200 sq. ft.)			Cooperative Society Ltd.		
2.	R.S. Plot Nos.279 and 287 recorded in R.S. Khatian No. 863/1, Mouza - Binnaguri, J.L. No.3, R.S. Sheet No.17, Jalpaiguri, District - Jalpaiguri, PIN - 734015, WB	Warehouse for IOCL	February 08, 2023	Shakti Polypet Pvt Ltd	Rs. 36,300/- (Initial two years from the lease tenure) Rs.39,930/- (only for final year of lease tenure)	A period of Three Years from the date of 01/01/2023

These leases are renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability.

For further details of properties, please refer to the chapter titled **"Our Business"** beginning on page 167.

26. We are dependent on our key management team as well as our mid-to-senior personnel and our success depends in large part upon our Promoters. The loss of or our inability to attract or retain such persons could materially adversely affect our business performance.

Our business and the implementation of our strategy is dependent upon our key management team, who oversee our day-to-day operations, strategy and growth of our business. There can be no assurance that we will be able to retain these personnel or find adequate replacements in a timely manner, or at all. We may not be able to hire and train replacement personnel immediately when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. Further, our competitors may offer compensation and remuneration packages beyond what we are offering to our key management team. If one or more members of our key management team are unable or unwilling to continue in their present positions, such persons would be difficult to replace in a timely and cost-effective manner, and our business, prospects, results of operations and cash flows could be materially adversely affected.

27. Failure or disruption to our Information Technology and/or business resource planning systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.

We have implemented various information technology ("IT") and/or business resource planning systems to cover key areas of our operations. We are dependent on technology in relation to customer order management and dispatches, financial accounting and scheduling material purchase and shipments. We rely on our IT infrastructure to provide us with connectivity and data backup across our locations and functions. We believe that we have deployed adequate IT disaster management systems including data backup and retrieval mechanisms, at registered office and other locations. However, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to plan, track, record and analyze work in progress and sales, process financial information, manage our creditors, debtors positions, or otherwise conduct our normal

business operations, which may increase our costs and otherwise adversely affect our business, financial condition, results of operations and cash flows.

28. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategies could have an adverse effect on our business, results of operations and financial condition. The success of our business will depend greatly on our ability to effectively implement our business and growth strategies.*

Our growth strategies require us to develop and strengthen relationships with existing customers for our business who may drive high volume orders on an ongoing basis. To remain competitive, we seek to increase our business from existing customers and by adding new customers, as well as expanding into new geographical markets. Our success in implementing our growth strategies may be affected by:

- a) Continue to provide one stop solution;
- b) Diversification;
- c) Leveraging existing Customer Base;
- d) Improving the financial efficiency resulting in better cost management;
- e) Procurement from other suppliers besides dealerships for better margins and
- f) Customer Relationship Management.

Many of these factors are beyond our control and there is no assurance that we will succeed in implementing our strategies. While we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could adversely impact our results of operations. We expect our growth strategies to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and growth strategies could have a material adverse effect on our business, financial condition and profitability.

29. *Any inability to address changing industry standards and customer trends may adversely affect our business, results of operations and financial condition.*

The future success of our business will depend in part on our ability to respond to technological advances, customers preferences and emerging industry standards and practices in a cost-effective and timely manner. The development and implementation of such new technology entails technical and business risks. We may have to incur substantial capital investment to upgrade our equipment and facilities. While we continue to invest in various product development initiatives, adopt enhanced technologies and processes for the development of new products, we are subject to general risks associated with introduction and implementation of new products including the lack of market acceptance and delays in product development. There can be no assurance that we will be able to successfully develop new products or that such new products will receive market acceptance or adapt our manufacturing processes to incorporate new technologies or address changing customers trends or emerging industry standards. Any rapid change in the expectations of our customers, in our business on account of changes in technology or introduction of new alternate products could adversely affect our business, results of operations and financial condition.

30. *Our Promoter, Director and Group entities have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Our Promoters, Directors and Group entities have provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

31. Pricing pressure from customers may affect our gross margins.

Our ability to remain competitive and profitable depend on our ability to source and maintain a stable and sufficient supply of raw materials at cost effective prices. Historically, prices of material costs have increased such as Gas and petroleum products which have a significant effect on our gross margins. We depend on external suppliers for our materials on a purchase order basis and place such orders with them in advance on the basis of our anticipated requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our suppliers. For further information on procurement of our materials, see “*Our Business*” beginning on page 167.

32. Our Company is reliant on key customers for our business and therefore any adverse developments in our relationships with our key customers or a significant reduction in business from any such key customer may adversely impact our results of operations, prospects and financial condition.

The identity and correspondingly revenues from any particular customer or our top five customers may vary between financial reporting years depending on the nature and term of ongoing contracts with such customers. For the period ended on September 30, 2023, and for the financial year ended on March 31, 2023, March 31, 2022, and March 31, 2021, our top five customers across our business accounted for Rs. 1,602.55 lakhs, Rs 4,511.48 lakhs, Rs 4134.88 lakhs, Rs 2547.33 lakhs and 29.16%, 28.73%, 24.18% and 24.92% of our revenue from operations, respectively, while our largest customer accounted for Rs. 891.09 lakhs, Rs 1482.42 lakhs, Rs 1087.53 lakhs, and Rs. 630.82 lakhs and 16.21%, 9.44%, 6.36% and 6.17% of our revenue from operations respectively, in such periods. Thus, our Company is reliant on key customers for our business and therefore any adverse developments in our relationships with our key customers or a significant reduction in business from any such key customer may adversely impact our results of operations, prospects and financial condition.

33. Our success is dependent on our ability to enter and expand our network in new markets which is further dependent on our familiarity with the economic condition, customer base and commercial operations in new regions.

Our success is dependent on our ability to enter and expand our network in new markets which is further dependent on our familiarity with the economic condition, customer base and commercial operations in new regions. With limited presence, our ability to gain market share is also dependent on our ability to compete with companies that may have an existing strong presence.

However, we may not be successful in expanding our network or increasing our market presence. Further, we may also face disruptions in selling our products for various reasons such as transportation bottlenecks, raw material inaccessibility, competition activities, labour issues, natural disasters, etc. which may result in disruptions to our business.

- 34. We have in the past entered transactions with related parties and may continue to do so in the future. These or any future related party transactions may potentially involve conflicts of interest and there can be no assurance that we could not have achieved better terms, had such arrangements been entered into with unrelated parties.**

We have entered into various transactions with related parties, including the purchase and sale of services from time to time. While we confirm that these related party transactions entered into by us, were in compliance with the Companies Act, 2013 as amended and other applicable laws, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Also, upon listing of our Equity Shares pursuant to the issue, all related party transactions that we may enter into, will be subject to the requirements of the Companies Act, 2013 and the SEBI Listing Regulations, there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not achieve more favourable terms if such transactions had not been entered into with related parties. Such related party transactions may potentially involve conflicts of interest.

- 35. Default or delay in payment by a significant portion of our customers, may have an adverse effect on cash flows, result of operations and financial conditions.**

We may encounter problems in executing the orders in relation to our products on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause it cancellation. Due to the possibility of cancellation or changes in scope and schedule of delivery of such products resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or in full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay the amounts they owed.

In the ordinary course of business, we extend credit to our customers. Our results of operations and profitability depend on the creditworthiness of our customers. Certain of these customers may have weak credit histories and we cannot assure that these counterparties will always be able to pay us in a timely fashion, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us.

Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition. Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition.

36. *We may not have sufficient insurance coverage to cover all possible losses.*

Our operations carry inherent risks of personal injury and loss of life, damage to or destruction of property and damage to the environment, and are subject to various risks such as fire, theft, flood, earthquakes, and terrorism. We maintain insurance coverage in amounts we consider to be commercially appropriate. Our insured assets primarily consist of property, office equipment, furniture, fixtures and fittings, inventory, etc. In the past three years, there have been no instances of under insurance i.e., where our insurance cover did not adequately cover the insured value required for our operations. However, there can be no assurance that our current and future insurance will adequately cover all losses or liabilities that may arise from our operations, including, but not limited to, when the loss suffered is not easily quantifiable. While we have not had any such instance in the past three years, there can be no assurance that in the future our losses would not significantly exceed our insurance coverage or may not be recoverable through insurance and consequently our business, financial condition and results of operations could be materially and adversely affected. For further details of insurance see *“Our Business”* on page 167.

37. *Industry information included in this Prospectus has been derived from publicly available industry reports and/or websites. There can be no assurance that such third-party statistical, financial, and other industry information is either complete or accurate.*

We have relied on the information from various publicly available industry reports and/or websites for the purpose of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere.

38. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate. For details of our dividend history, see **“Dividend Policy”** on page 237.

39. Certain of our Directors hold Equity Shares in our Company and are therefore interested in our Company’s performance in addition to their remuneration and reimbursement of expenses.

Our directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding as nominee shareholder on behalf of our holding company or the shareholding of their relatives in our Company. There can be no assurance that our directors will exercise their rights as Shareholders to the benefit and best interest of our Company. For further details, see **“Related Party Transactions”** under chapter titled **“Financial Statements as Restated”** and **“Our Management”** on page 278 and 208 respectively.

40. Within the parameters as mentioned in the chapter titled ‘Objects of the Issue’ beginning on page 113, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

We intend to use Issue Proceeds towards Funding the Working Capital Requirements, General Corporate Purposes and to meet Issue expenses. We intend to deploy the Net Issue Proceeds in FY 2023-24 and 2024-25. Such deployment is based on certain assumptions and strategy which our Company believes to implement in near future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled **“Objects of the Issue”** beginning on page 113.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled **“Objects of the Issue”** beginning on page 113, the Management of the Company will have significant flexibility in applying the proceeds received by our Company from the Issue.

However, the Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the issue without our Company being authorized to do so by our shareholders by way of special resolution and other compliances in this regard.

41. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Issue*” beginning on page 113.

42. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.

Our Company intends to use Net Proceeds raised pursuant to the Fresh Issue in the manner set out in the section titled “*Objects of the Issue*” on page 113. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution.

In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

43. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

44. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Our Issue size is less than Rs. 10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. However, as per Section 177 of the Companies Act, 2013, the Audit Committee of our Company would be monitoring the utilization of proceeds of the Issue. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 45. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of the Issue, our Promoters and Promoter Group will collectively own 67.29 % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 46. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

- 47. *We have incurred indebtedness, and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.***

We have entered into agreements with certain banks for short-term and long terms facilities which contain restrictive covenants, including requirements that we obtain NOC/Consent from the lenders prior to undertaking certain matters including altering our capital structure, further issuance of any shares, effecting any scheme of amalgamation or reconstruction, changing the management and dilution of Promoters' shareholding, and creation of security. Further, in terms of security, we are required to create a mortgage or charge over our movable and immovable properties. We may also be required to furnish additional security if required by our lenders. Additionally, we are required to, among others, maintain the prescribed debt coverage ratio, net total debt, and fixed asset coverage ratio. There can be no assurance that we will be able to comply with these financial or other covenants at all times or that we will be able to obtain the NOC/Consent necessary to take the actions that we believe are required to operate and grow our business. Further, we are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further, under certain of our financing agreements, the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. Our Company sought to obtain the relevant NOC/Consent in relation to the Issue, from the respective lenders in advance of the date of this Prospectus.

Issue Specific Risks

- 48. *Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors.***

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchange. These measures are in place to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. Securities are subject to GSM when its price is not commensurate with the financial health and fundamentals of the issuer. Specific parameters for GSM include net worth, net fixed assets, price to earning ratio, market capitalization and price to book value, among others.

Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

- 49. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by designated stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 50. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of

trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

51. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

There has been no public market for Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market after this Issue.

52. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by Book Built Method. This price is based on numerous factors (For further information, please refer chapter titled "***Basis for Issue Price***" beginning on page 126 and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues.
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community.
- General market conditions; and
- Domestic and international economic, legal, and regulatory factors unrelated to our performance.

53. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence.

We cannot assure you that the Equity Shares will be credited to the investor's demat accounts, or that trading in the Equity Shares will commence within the time periods specified in the Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, if permission to list the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

54. QIB and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting the Bid.

Pursuant to SEBI ICDR Regulations, QIBs and Non-Institutional investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting the Bid. Retail Individual Investors can revise their Bid during the Bid Period and withdraw their Bids until Bid Closing date. While our Company is required to complete Allotment pursuant to Issue within four working days from the Bid Closing date, events affecting the Bidders decision to invest in Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, result of operations or financial condition may arise between the date of submission of the Bid and allotment. Our Company may complete the allotment of Equity shares even if such events occur, and such events limit the Bidders ability to sell the Equity Shares allotted pursuant to the Issue or cause the trading price of Equity Shares to decline on listing.

55. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK

Industry Related Risks

56. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and the results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

57. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

The Government of India implemented a comprehensive national goods and service tax ("GST") regime that combines taxes and levies by the central and state governments into a unified rate

structure from July 01, 2017, which we believe will result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

Furthermore, the Finance Act, 2023 instituted a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long-term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others.

58. *A slowdown in economic growth in India could have an adverse effect on our business, results of operations, financial condition, and cash flows.*

Purv Flexi Pack Limited is a provider of flexible packaging solutions in India. Our performance and growth are, and will be, dependent to a large extent on the health of the Indian economy and consumption spending by businesses and consumers. Economic growth in India is affected by various factors including domestic consumption and savings, rate of inflation in India, balance of trade movements, and global economic uncertainty.

Our revenue is generated primarily from the sale of direct supply of various plastic-based products such as Biaxially Oriented Polypropylene (BOPP) film, Polyester Films, Cast Polypropylene (CPP) films, Plastic granules, Inks, Adhesives, Masterbatches, Ethyl Acedate, and Titanium Dioxide. In addition, our company is a Del Credere Associate (DCA) of Indian Oil Corporation Limited and operates as a Dealer Operated Polymer Warehouse (DOPW) for their polymer division. Consumption of these products has increased due to increased demand for packaged goods in India, which has been positively and materially affecting our operating results. Consequently, future changes in the Indian economy, especially the purchasing power of businesses and consumers, is expected to directly impact our revenues and results of operations. Further, India has in the past experienced high rates of inflation. In addition, from time to time, the Government of India has taken measures to control inflation, which have included tightening monetary policy by raising interest rates, restricting the availability of credit and inhibiting economic growth.

Inflation, measures to combat inflation and public speculation about possible governmental actions to combat inflation have also contributed significantly to economic uncertainty in India and heightened volatility in the Indian capital markets. Periods of higher inflation may also slow the growth rate of the Indian economy and increase some of our costs and expenses. To the extent that the demand for our products decreases or costs and expenses increase, and we are not able to pass those increases in costs and expenses on to our customers, our operating margins and operating income may be adversely affected, which could have a material adverse effect on our business, financial condition and results of operations.

Other Risks

59. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.

As stated in the reports of the Auditor included in this Prospectus under chapter **“Financial Statements as restated”** beginning on page 238, the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus.

Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

60. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

For instance, in November 2016, the Government of India demonetized certain – high value denominations of currency. Trading and retail businesses in India were impacted for a limited period on account of such demonetization. Such businesses have subsequently needed to introduce additional point of sale instruments to improve their collection process.

The Government of India implemented a comprehensive national goods and service tax (“GST”) regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which we believe will result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

Further, the General Anti Avoidance Rules came into effect on April 1, 2017. The effect of the application of these provisions to our business in India is at present uncertain. Furthermore, the Finance Act, 2019 instituted a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long-term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others.

61. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

62. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which our company operates contained in the Prospectus.*

While facts and other statistics in this Prospectus relating to India, the Indian economy and the industry in which our company operates has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled ***“Our Industry”*** beginning on page 140. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

63. *Financial instability in Indian financial markets could adversely affect our Company’s results of operations and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company’s business, operations, financial condition,

profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

64. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.*

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE Limited could adversely affect the trading price of the Equity Shares.

65. *Global economic, political, and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

66. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

67. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

68. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

69. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

Reasons for raising additional working capital

Our company is seizing an opportunity to import polymer of non-IOCL grades from countries like Middle east, China, Singapore and USA. Our group companies are already importing these types of polymers from abroad and consuming them in our subsidiary company and selling them in open market. As per our management survey there is huge potential for these type of products in India and our company plans to import them on large scale basis. At present prices of these type of polymers is cheap in comparison to Indian manufactured polymers and our company wants to cash-in the opportunity as we have established connects in the corporates and users using these polymers due our experience in this line of trade for more than 30 years. Our company also plan to expand its product range further and explore new avenues of growth i.e.

- Aluminum Foil of SRF which uses in the application in household foil, flexible packaging and pharma sector
- Different chemical of Solvay which uses in the application in Binder, Adhesive, Paints, Solvent, Floor Cleaning etc.

To fund the import of these non-IOCL grade polymers, we require substantial funds in addition to our sanctioned working capital limits. At present, cost of these polymers is around 1,15,000 lac/per tonne which includes custom duty and clearance charges. Price of these polymers is very volatile and keeps on fluctuating as per international crude price. We plan to import around 1,100-1,300 tonne per month and need fund to acquire them. Further with the additions of aluminum foil and chemical Solvay in our

products portfolio, our investment in inventories will increase.

Basis of estimation of working capital requirement

On the basis of existing and estimated working capital requirement of our Company and assumptions for such working capital requirements, our Board pursuant to its resolution dated **September 28, 2023**, has approved the projected working capital requirements for FY 2023-24 and FY 2024-25 and the proposed funding of such working capital requirements as set forth below:

GLOBAL ECONOMIC OVERVIEW

GLOBAL PROSPECTS

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China.

Contributions to global growth

The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China.

Inflation

pressures persist, and the drag on

growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years. This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth.

Growth in EMDEs

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with

Contributions to potential growth

more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year.

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024 (figure 1.1.E). That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

EMDE growth in 2023, by credit rating

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than anticipated recovery in China, but subsequently retraced those gains. Agricultural prices have been easing on the back of good production prospects for most crops.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023.

GLOBAL RISK AND POLICY CHALLENGES

Global inflation is projected to gradually edge down as growth decelerates, labor demand in many economies softens, and commodity prices remain stable. The slow pace of improvement means that core inflation is expected to remain above central bank targets in many countries throughout 2024.

Risks to the outlook remain tilted to the downside. Recent advanced-economy bank turmoil highlights the possibility of more disorderly failures, which could lead to systemic banking crises and protracted economic downturns, with spillovers to sovereigns and across borders. These failures could be triggered by mounting concerns about balance sheet quality, continued losses in the heavily leveraged

Global growth under different scenarios

only be 1.3 percent, about half the pace in the baseline forecast. In another scenario where financial stress propagates globally to a far greater degree, the world economy would fall into recession in 2024, as global growth of only 0.3 percent would imply a contraction in global per capita GDP.

Many of the current challenges reflect underlying longer-run trends. Potential growth in EMDEs has been on a decades-long declining path because of slowing growth rates of labor force, investment, and productivity. The slowdown in these fundamental factors has been exacerbated by the overlapping shocks of the pandemic, Russia's invasion of Ukraine, and the sharp tightening of global monetary policy in response to high inflation. Reversing the decline in potential growth will require decisive structural reforms. These include measures to improve investment conditions, develop human capital and infrastructure, increase participation in the formal labor force, foster productivity growth in services, and promote international trade. In particular, fostering investment in green energy and climate resilience can ensure that growth is both robust and sustainable.

GLOBAL TRADE

commercial real estate sector, or by the ongoing decline in house prices in many countries.

In a scenario where banking stress results in a severe credit crunch and broader financial stress in advanced economies, global growth in 2024 would

Global potential growth under reform scenarios

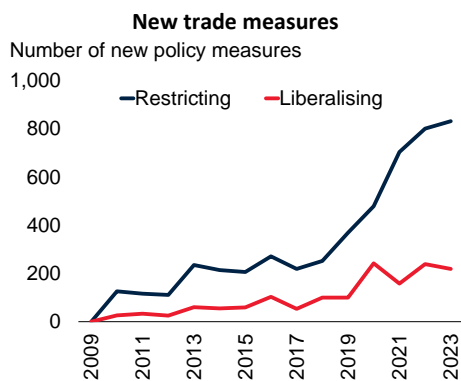

Global goods trade growth slowed in the first half of 2023 in tandem with weakening global industrial production. Services trade, by contrast, continued to strengthen following the easing of pandemic-induced mobility restrictions. International tourist arrivals are expected to approach 95 percent of 2019 levels in 2023, an increase from 63 percent in 2022 (UNWTO 2023).

Pressures on global supply chains have abated as goods demand has weakened and global shipping conditions have improved. The global supply chain pressures index and suppliers' delivery times reached their lowest levels in almost four years in the first half of 2023 and are expected to remain low.

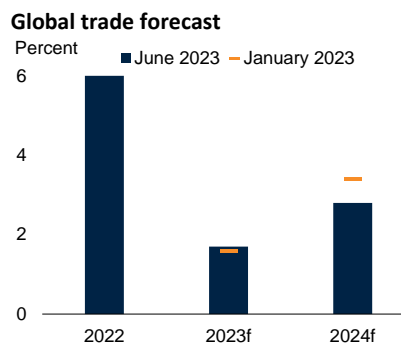

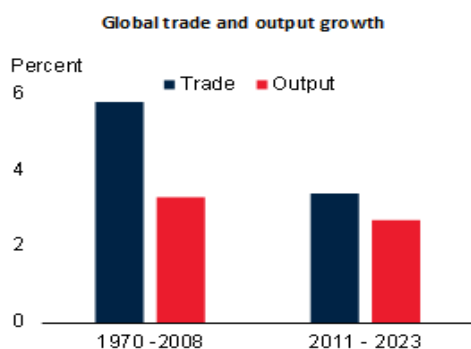

During the pandemic, trade growth was supported by a shift in the composition of demand toward tradable goods and away from services, which are less trade-intensive. The gradual rotation of demand back to its pre-pandemic composition is now slowing trade growth- as is the fact that the

recovery in China is expected to be predominantly driven by services, which will limit positive spillovers to its trading partners through demand for goods and commodities. The growing number of restrictive trade measures reflects a rising degree of geopolitical tensions and attempts by some major economies to follow more inward-looking policies. In the longer term, this will likely reshape global supply chains and increase trade costs (EBRD 2023; Góes and Bekkers 2022).

Together, these factors are expected to further reduce the responsiveness of global trade to changes in output—responsiveness that had already declined in the 2010s relative to previous decades (figure 1.3.C; Kose and Ohnsorge 2023a). Against this backdrop, global trade growth is forecast to slow from 6 percent in 2022 to 1.7 percent in 2023. As global consumption returns to its pre-pandemic mix between goods and services, trade is expected to recover to 2.8 percent in 2024, only slightly stronger than GDP growth. The trade outlook is subject to various downside risks, including weaker-than-expected global demand,

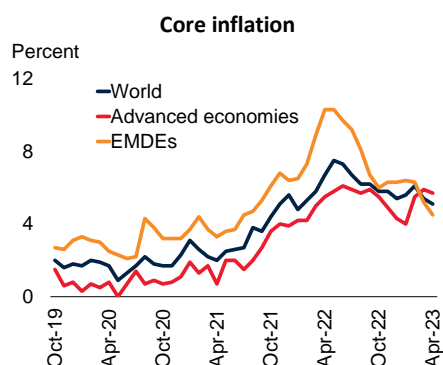

tighter global financial conditions, worsening trade tensions between major economies, mounting geopolitical uncertainty, and a further rise in protectionist measures (Aiyar et al. 2023; Metivier et al. 2023).

GLOBAL INFLATION

Inflation remains above target in almost all inflation-targeting economies. Median headline global inflation stood at 7.2 percent year-on-year in April, down from a peak of 9.4 percent in July 2022. This deceleration largely reflects favorable base effects from commodity prices falling below their 2022 peaks, along with abating supply chain pressures.

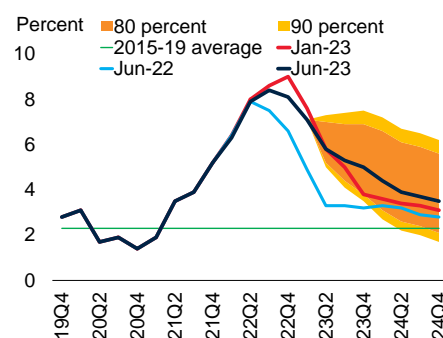

Moderating energy prices help explain global inflation being somewhat softer in the first quarter of 2023 than previously anticipated. However, recent core inflation measures suggest the disinflation that started last year has made only halting progress. Across EMDEs, three-month median core inflation has decelerated somewhat in recent months, while it has picked up in advanced economies. Amid these developments, global inflation is envisaged to remain further above its 2015-19 average than was expected in January, and for a longer period.

With supply chain pressures easing and energy prices

declining, excess demand appears to be a key driver of continuing high inflation in advanced economies, though lingering impairments to supply capacity may also still play a role (Bernanke and Blanchard 2023). In Europe, the role of energy prices is particularly important—the pass-through of energy costs into broader prices may be adding to inflation persistence, which could be further exacerbated by the sunset of fiscal programs that have attenuated price spikes for end-users (Pill 2023). The absence of economic slack may also be increasing the ability of firms and workers to exercise pricing power, such that inflation has become more responsive to economic activity (Borio et al. 2023; Gagnon and Sarsenba yev 2022)

GLOBAL FINANCIAL DEVELOPMENTS

Advanced-economy banks started the year with unrealized losses on bond portfolios, which increased as interest rates rose. This, combined with shortcomings in risk management, contributed to the failure of several regional banks in the United States. In Europe, Credit Suisse came under intense market pressure in March and was subject to an emergency takeover. The initial emergence of banking stress drove a surge in market volatility, including the sharpest five-day drop in two-year U.S. yields in more than two decades and a large decline in bank equity prices. To bolster market confidence and limit contagion to the broader financial system, authorities have responded with emergency liquidity facilities. The U.S. authorities also introduced an expanded deposit guarantee for the banks that failed in March. Central banks have nonetheless reaffirmed intentions to maintain, or increase, the tightness of monetary policy until inflation shows a clear trend toward target. Even with continued signs of banking stress, broader risk appetite in advanced-economy financial markets has been notably resilient. High-yield corporate risk spreads have mostly stayed below their post-2010 average, despite bank lending standards reaching their most restrictive levels since the global financial crisis.

Spillovers from advanced-economy banking stress have so far been limited in most EMDEs, but have exhibited a similar divergence. Market perceptions of the creditworthiness of investment grade EMDEs (as measured by credit-default swap premia) were little affected in March, after the first bank failures in advanced economies; in contrast, credit default swap spreads for non-investment grade sovereign borrowers widened notably.

RECENT DEVELOPMENTS AND OUTLOOK

Advanced-economy growth is projected to slow to an annual average of 0.7 percent in 2023. This largely reflects the continued effect of considerable central bank policy rate hikes since early 2022. More restrictive credit conditions due to banking sector stress in advanced economies should slow domestic demand further in 2023. Past increases in energy prices and the expected softening in labor markets are also projected to weigh on activity. Growth is expected to accelerate modestly to 1.2 percent in 2024 due to a pickup in the euro area.

Growth in EMDEs is projected to edge up to 4 percent in 2023, which almost entirely reflects the rebound in China. Excluding China, EMDE growth is set to decline to 2.9 percent this year, from 4.1 percent last year, due to the drag from high inflation and the associated monetary tightening—both domestically and via monetary policy spillovers from advanced economies—as well as from slowing

external demand. From a regional perspective, growth is set to slow in all regions except EAP and ECA (box 1.1). Growth in EMDEs excluding China is expected to pick up modestly to 3.4 percent in 2024, as the effects of monetary tightening diminish and several larger EMDEs emerge from domestic strains, including natural disasters, power shortages, and political turbulence.

INDIAN ECONOMIC OVERVIEW

INTRODUCTION

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and

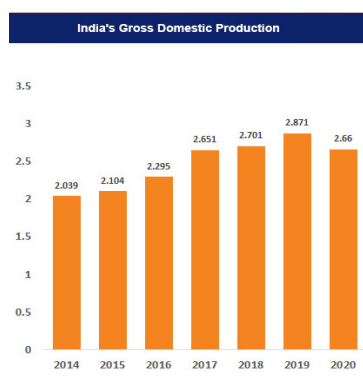

substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1%

of GDP in the first quarter of FY 2022-23. Exports fared remarkably well during the pandemic and aided

recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MOSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crore (US\$ 7.13 billion).
- The wheat procurement in Rabi 2021-22 and the anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

FLEXIBLE PACKAGING INDUSTRY

GLOBAL MARKET

The global flexible packaging market was valued at \$68.5 billion in 2021, and is projected to reach \$102.8 billion by 2031, growing at a CAGR of 4.2% from 2021 to 2031.

The finest characteristics of plastics and films are combined in flexible packaging. Such versatile packaging supplies functional solution that requires minimal production costs. From consumer goods

to electronics and cosmetics to medical supplies, flexible packaging is an important component in the supply chain of many industries and products. Flexible packaging adds value and marketability of both food and non-food products by combining the finest qualities of plastic, film, paper, and aluminum foil to provide a wide range of protective properties with the least amount of material.

Flexible plastic packaging uses a variety of plastic materials for the packaging of wide range of products. The type of material used in packaging depends upon the application and type of product to be packaged. Flexible plastic packaging typically uses plastic materials including polyethylene, polypropylene, polystyrene, and polyvinyl chloride. Flexible packaging is the most efficient and cost-effective approach for preserving, distributing, and packaging food products, beverages, pharmaceuticals, and a variety of consumables.

Increase in demand for snack and convenience food in small or single size portions fuels the growth of the flexible packaging market. The packaging industry is moving toward flexible packaging, owing to its multi-fold energy and environmental advantages. Moreover, growing concerns regarding the use of bio-degradable plastics for flexible packaging and its impact on the environment have also driven manufacturers to develop sustainable packaging options that are safe and secure. In order to reduce the cost pressure and maintain the integrity of product packages, manufacturers are considering sustainable packaging solutions that require fewer materials and energy to manufacture a package, reduce transportation expenses, and offer extended shelf-life to the product. Flexible packaging prevents moisture to enter in the packages and prevents corrosion. These advantages of flexible packaging will drive the market growth during the forecast period. However, recycling of plastic packaging waste is a complex process that requires state-of-the-art infrastructural facilities. It is a time-consuming process that needs personnel expertise. This may hamper the growth of the flexible packaging market.

Asia-Pacific is home to the world's largest working population. The need for packaging has been increasing as a result of growth in population, rise in income levels, urbanization, change in lifestyles, increase in internet penetration, and surge in development of the economy.

PACKAGING FILM INDUSTRY

The packaging film market is expected to witness a CAGR of 6% over the forecast period. The disposable income of consumers, urbanization and the demand for packaged food are the factors attributed to the growth of the market in emerging countries.

Plastic film is a continuous sheet of thin polymer material. "Sheet" is a common term for thicker plastic material. These delicate plastic membranes are employed as barriers, to retain objects, to divide spaces or volumes, and as printable surfaces.

- The growing e-commerce market and surge in demand for consumer goods and health products are driving demand for packaging films. Further, the rise in food delivery services due to maintaining hygiene and increasing investment in food delivery sectors post-pandemic are essential factors supporting the market's growth.
- Furthermore, the rising demand from the retail sector for the extended shelf life of packaged products and the consumers' demand for convenience products are augmenting the sales of packaging films in the retail industry.
- The rapidly growing usage of films in food packaging is significantly contributing to the growth of the packaging film market. This can be attributed to the increasing trend of down-gauging, which has supported the shift from rigid to flexible packaging. A strong focus on extending product shelf life and reducing packaging material waste, combined with a growing preference for packaged fresh foods such as fruits, meat, vegetables, and seafood, have increased demand for packaging films.
- However, the volatility of raw material prices, the ongoing drive for sustainability which includes replacing plastic-based packaging products with biodegradable materials, and mandates of using PCR (post-consumer recycled) plastics in response to growing environmental concerns are some of the major factors hampering the market growth.
- The COVID-19 pandemic has led to a significant increase in the demand for film packaging. The market experienced a marked increase in need through the rise in online shopping and food takeaway, which has led to an upsurge in the amount of packaging film usage. At the same time, the accelerated shift towards e-commerce resulted in a permanent plateau in production. Further, the Russia-Ukraine war has an impact on the overall packaging ecosystem.

PACKAGING FILM MARKET TRENDS

This section covers the major market trends shaping the Packaging Film Market according to our research experts:

- A Surge in E-commerce Business has Fueled Demand for Packaging
 - Because of COVID-19, there has been a renewed interest in packaging hygiene due to increased safety concerns. Furthermore, the period saw an increase in e-commerce, which increased the demand for well-designed and functional packaging films that are both sustainable and hygienic.
 - With the massive growth in online ordering, packaging film has gained popularity in the e-commerce market due to its discreet characteristics, which include being thicker than traditional clear shrink films to ensure durability and performance while keeping the contents of shipment private and having higher tear strength.
 - Shrink films are widely used for wrapping food packaging products in the e-commerce sector owing to their benefits, such as optimal shelf life and better oxygen transmission rates. With the demand for shrink film from the rapidly growing food industry, manufacturers are focusing on expanding their capacity to cater to this significant demand. For instance, In January 2022, IPG expanded its North American shrink film production by acquiring a new film plant in Everetts, NC, which allowed the company to expand its production capacity and product types.
 - The retail sector has witnessed strong growth due to changing lifestyles and rising disposable income. The emergence of online delivery services has shifted people's shopping habits from

traditional to e-commerce in the countries like Thailand. Modern retail stores such as supermarkets, hypermarkets, and convenience stores have also risen significantly. Thailand's retail sales, including online and in-store purchases, have increased dramatically in the past few years.

➤ **Asia-Pacific and Europe Contribute to Healthy Growth Rate over the Forecast Period**

- China is expected to account for the largest market share in the packaging films market of the Asia Pacific region, majorly due to its large middle-class population, increasing disposable incomes, and high demand for packaged food and pharmaceutical products. The increasing pharmaceutical production in the region is significantly driving the growth of the packaging film market in the region.
- The e-commerce sector's growing presence in Southeast Asian nations such as Thailand is paving the way for packaging film in the region. Moreover, custom-made packaging films and wraps are required for industrial applications involving industrial powders, granular chemicals, lubricants, agricultural products, and other materials, which cater to market growth.
- There have been various expansion activities by companies in the market to enhance their geographical presence and position. For instance, in December 2021, PTL launched a BOPP line in Indonesia as a part of its Southeast Asia expansion plans. With the start-up of the new BOPP film line, a 10.6-meter line, the company aims to further strengthen the cost-effectiveness of the operations in Indonesia due to economies of scale and improve its industry positioning in the geography.
- The growing popularity of ready-to-eat meals that require safe packaging in the Asia Pacific and the growth of the food and beverage industries create a significant demand for high-quality and cost-effective packaging such as Cling films made of polyvinyl chloride (PVC) is a sustainable option for fresh food packing.

PLASTIC PACKAGING INDUSTRY - INDIA

The India Plastic Packaging Market is predicted to grow at a CAGR of 2.5% in the projected timeframe. The growing preference for convenience and portability packaging continues to be a significant driver of rigid plastics in food packaging. Also, the need for comfort, portability, and tensile strength remains crucial for rigid plastics usage in the cosmetics & toiletries industry.

- Flexible packaging accounts for more than 60% of the market and is mainly used for food, according to the Flexible Packaging Association. Since flexible packaging can offer solutions to various packaging problems, the demand for flexible packaging is expanding. According to IBEF, India's grocery and food market are the sixth-largest in the world, with 70% of sales coming from retail. Also, food processing accounted for 32% of India's total food market and was rated fifth in production, consumption, and export. It would propel the demand for flexible plastic in packaging.
- The need for e-commerce packaging is developing in India due to the country's expanding economy, growing middle class, changing lifestyles, and increasing population. The India Brand Equity Foundation predicts that by 2026, the country's e-commerce market will reach USD 200 billion. The boom in internet and smartphone use is also driving the majority of the industry's growth.
- Also, in July 2021, DRDO collaborated with Acharya Nagarjuna University, and Ecolastic Private Limited introduced environmentally-friendly packaging products made from natural and plant-based food-grade materials to eliminate single-use plastic. These bags are sustainable, cost-effective, and ocean-safe alternatives to single-use plastics, unlike traditional polyethylene bags created from petrochemicals, which are hazardous to the environment and take years to degrade.
- According to Union Environment Minister Prakash Javadekar, India is also making every effort to secure a comprehensive ban on single-use plastic by 2022, as Prime Minister Narendra Modi envisioned. The nation started the Plastic Hackathon 2021 campaign to raise awareness of single-use plastics in June 2021, anticipating it hindering the market growth.
- Due to the COVID-19 outbreak, the nutritional drinks and healthy food demand increased exponentially. The majority of these products are packaged with single-use plastic. The orders were so huge globally that the manufacturers and packaging companies in the field expanded their facilities, which most governments supported. Further, the Russia-Ukraine war also impacted the overall packaging ecosystem.

INDIA PLASTIC PACKAGING MARKET TRENDS

This section covers the major market trends shaping the India Plastic Packaging Market according to our research experts:

- Growing E-commerce Industry is Expected to Drive Growth
 - Over the past years, the e-commerce industry in India is growing significantly. According to projections, the Indian e-commerce market will increase to USD 200 billion by 2026 from USD 38.5 billion in 2017. Increased internet and smartphone use and the nation's continuing digital transformation are anticipated to fuel this rise. The e-commerce sector briefly fell after India closed down in March 2020, but things started to pick up after the uplifting of restrictions. The number of online orders placed through marketplaces and direct brand websites increased by 130% overall.
 - Also, amid the e-commerce boom, one of the fastest-growing sectors is the Indian packaging business, which is expanding rapidly. The Indian Institute of Packaging (IIP) estimates that India's per-person annual packaging usage grew by 200% in the last ten years, from 4.3 kg to 8.6 kg.
 - Additionally, during the pandemic, the Indian e-commerce industry witnessed significant growth in online order volume due to the restrictions imposed on the people movement and the shutdown of physical stores. For instance, according to Flipkart, the Indian e-retail market saw a 25% growth in FY21 despite the two-month national lockdown and multiple prolonged disruptions in regional pockets over the year.
 - Moreover, recycling became a significant factor for businesses that make perfume, skincare, and cosmetics. An agreement to produce and market polyethylene (PE) film solutions derived from post-consumer recycled (PCR) plastics in India was signed in February 2021 by Dow Packaging and Specialty Plastics (P&SP) and Lucro Plastecycle, an Indian recycling company. This agreement expands the Asia-Pacific region's overall circularity portfolio and provides a closed-loop packaging solution to assist India in creating a circular economy.
 - Furthermore, people across the country are increasingly buying online groceries, food items, and daily essentials while also purchasing merchandise online. Such trends are anticipated to boost the demand for recycled plastic, as the e-commerce and retail industry is one of the country's significant flexible packaging solution adopters. E-commerce players such as Amazon and sellers across the country adopted recyclable plastic packaging, which includes recycled plastic bags. Also, the increasing number of online shoppers in India is anticipated to support market growth. For instance, according to The Hindu, the number of online shoppers in India increased from 110 million in 2018 to 190 million in 2021.

BOPP FILMS MARKET-INDIA

The Indian BOPP films market is expected to witness a CAGR of 5% during the forecast period (2021-2026). The market trend is predicted to gain traction in the anticipated years due to the fact that BOPP films are more flexible and enable faster packaging with advanced sealing properties, compared to other packaging materials. This has pushed manufacturers to come up with new techniques pertaining to the manufacturing of BOPP films to serve the demand of various industries.

- BOPP films offer excellent moisture barrier, and the metalized variant provides a better oxygen barrier. These properties of BOPP films play a crucial role in food packaging to extend the shelf life of products, thereby reducing food waste. Apart from the barrier properties, BOPP films provide consistent seal integrity because of narrow gauge spread. Good heat seal strength, broad sealing window lower seal initiation temperature, and good machinability further enhance their utility in the food packaging industry for protecting food quality.
- One of the primary factors that will lead to the growth of BOPP films use is their relatively low carbon footprint compared to other plastic films. Because of its low melting point, BOPP films require lower energy to get converted from one form to another. Further, BOPP film is part of the wider polyolefin chemical family, which means it can be laminated with polyethylene film and still widely accepted in the recycling waste stream. In many applications, the consumption of BOPP film has benefitted from the sustainability drive at the expense of other polymers.
- With the recent outbreak of COVID-19, the pouch packaging manufacturers are facing supply chain disruption along with decreasing manufacturing at the site in many parts of the world. To ensure the smooth flow of supply chain, much Global food safety initiative (GFSI) certification programs are providing six-month certificate extensions by conducting a remote audit and risk assessment pertaining to COVID-19 such that the company can approve a new supplier location without an on-site audit to meet the demand.
- Moreover, the outbreak will see the spur of flexible packaging uses across the country. India has very low consumption per capita of flexible packaging for fresh and processed meat and seafood, compared to Japan, the United States, and Western Europe. But the usage has been increased due to several advantages offered by flexible packaging solutions, such as live on-site butchering, including improved sterilization, tracing and recall, and extended shelf life.

Biaxially Oriented Polypropylene Films (BOPP films) are manufactured by stretching the polypropylene films. These films are widely used in applications, such as packaging, labeling, and lamination. BOPP films are considered to be the barrier films substrate for food packaging, offering inherent moisture barrier properties, sealability, high clarity, and graphic reproduction and shelf appear. The study of the market has considered the wide range of applications of BOPP films in flexible packaging and industrial usages.

Growing Demand for Packaged Food to Drive the Market Growth

- The packaged food or ready to eat food is one of the fastest-growing segments, especially in urban centers. The fast-paced life in urban cities and the steep rise in income and the standard of living is leading to the increasing use of packaged food.
- According to the IBEF, the Indian food and grocery market is the world's sixth-largest, with retail contributing 70% of the sales. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India, and is ranked fifth in terms of production, consumption, export, and expected growth. Also, according to the data provided by the Department of Industrial Policies and Promotion (DIPP), the food processing sector in India received around USD 7.54 billion worth of foreign direct investment (FDI) during April 2000-March 2019.
- Moreover, companies are investing in the Indian food market. For instance, Cargill Inc., a US-based food company, aims to double its branded consumer business in India by the end of 2020, by doubling its retail reach to about 800,000 outlets and increasing market share to become a national leader in the sunflower oil category, which will help the company be among the top three leading brands in India.

Industrial Application of BOPP to Grow Significantly

- BOPP film is part of the wider polyolefin chemical family, which means it can be laminated with polyethylene film, and still be widely accepted in the recycling waste stream. In many applications, the consumption of BOPP film has benefitted from the sustainability drive at the expense of other polymers. Also, when organoclay and nanocomposite materials are blended with BOPP, their barrier properties are enhanced. PVA (Poly (vinyl alcohol)) and MA (Maleic Anhydride) are the most suitable materials for minimizing the oxygen permeability of the films.
- Due to the high growth rate in the Indian economy, the BOPP market in the country is witnessing a high growth rate because of the surging development of the pharmaceutical, retail, cosmetic industry apart from the food and beverage industry. The e-commerce sector has one of the largest applications of BOPP self-adhesive tapes in the country, as it offers superior mechanical and optical features.
- In India, owing to the low cost of production, the players are expanding their production capacities to meet the increasing demand for BOPP. For instance, Cosmo films has announced to increase its production capacity of BOPP to 0.035 million megatons, which is expected to be commercialized by the end of 2020. Similarly, Jindal Polyfilms will increase its production capacity to 0.044 million megatons.

INK MARKET-INDIA

India has emerged as one of the largest consumers and producers of inks in the Asia Pacific region. An ever increasing middle-class has propelled the ink usage in most of the sub-segments of the industry.

However, COVID-19 has slackened the pace of growth in some of the key sub-segments of ink industry during the last 16 months. *Ink World* presents an overview of the Indian ink industry and impact of COVID-19 on the industry.

Overview of the Indian Ink Industry

Catered by nearly all the multinational ink producers and an increasing number of domestic ink producers, the Indian ink industry has registered steady growth rates during last few (barring the year 2020) years. Along with multinational ink producers, domestic ink producers have started to invest in capacity and capability expansions in recent years. However, the ongoing COVID crisis has been a big dampener for some of the sub-segments of the ink industry. Like the rest of the global ink industry, 2020 was a year fraught with

multiple challenges for the Indian ink industry and producers. Most of the industry stakeholders are unanimous that the overall volume of ink consumption suffered a decline of 3% to 4% in 2020.

Negative economic growth was the prime reason behind the decline in ink consumption in the country in 2020. The Indian economy slowed down from its growth track on account of a stringent lockdown imposed in March to prevent the spread of the COVID-19 pandemic. India's GDP declined by 7.3% in fiscal 2020-21, for the first time in four decades. However, the medium-term growth outlook is expected to improve and record a growth rate of approximately 7.3% by 2025 on account of strong macroeconomic fundamentals, including moderate inflation, the implementation of key structural reforms and the improved fiscal and monetary policies.

COVID-19 has resulted in a mixed impact on different segments. Though all businesses were severely impacted in the country during March-June 2020 due to increased demand of packaged food items, the flexible packaging segment started to make a quick recovery after June 2020 and soon stabilized at near pre-COVID-19 levels. Other packaging segments also recovered and came close to pre-COVID-19 levels by the last quarter of 2020.

The publication inks business, however, has had the severest impact. The newspaper industry is still below pre-COVID-19 levels due to the drop in advertising revenue and circulation.

Decline in volume in ink production and consumption is evident from the financial numbers of some of the ink producers in the country. For example, in 2020, DIC India's ink business (the company operates in two segments, inks and lamination adhesives) registered total sales revenue of INR 5.491 billion, a drop of 24% against sales of INR 7.262 billion in 2019.

ETHYL ACETATE MARKET-INDIA

The India ethyl acetate market size was valued at \$432.0 million in 2021, and is projected to reach \$824.4 million by 2031, growing at a CAGR of 6.7% from 2022 to 2031.

Ethyl acetate is a colorless, volatile, and flammable liquid with a fruity odor. It is commonly used as a solvent in various industries in India, including pharmaceuticals, paints and coatings, printing inks, adhesives, and food flavorings.

One of the primary uses of ethyl acetate in India is in the pharmaceutical industry. Ethyl acetate is used as a solvent in drug manufacturing processes, particularly for the extraction of active pharmaceutical ingredients (APIs) from plants. India is a significant producer of generic drugs, and the demand for ethyl acetate as a solvent is expected to continue to grow as the Indian pharmaceutical industry expands.

In the paints and coatings industry, ethyl acetate is used as a solvent for nitrocellulose lacquers, acrylic lacquers, and other coating systems. The growth of the Indian construction industry has led to an increase in demand for paints and coatings, which in turn has boosted the demand for ethyl acetate as a solvent. The printing industry in India also uses ethyl acetate as a solvent for inks. Ethyl acetate-based inks are fast-drying and produce high-quality prints, making them ideal for printing on a variety of surfaces, including paper, plastic, and metal.

India ethyl acetate market, by application

On the basis of application, the process solvents segment dominated the India ethyl acetate market in 2021. In the manufacturing of pharmaceutical and cosmetic goods, ethyl acetate is used as a process solvent. It is especially helpful when removing natural goods like essential oils from plant-based materials. The creation of flavors and aromas involves the use of process solvents. When

decaffeinated coffee and tea are made, it is also employed as a solvent for the separation of caffeine. Ethyl acetate is used as a process solvent in the production of pharmaceutical and cosmetic products. It is particularly useful for extracting natural products, such as essential oils, from plant materials. Process solvent is used in the production of flavors and fragrances. Ethyl acetate is becoming increasingly popular as a process solvent for adhesives used in a variety of sectors, including automotive, construction, and woodworking. Ethyl acetate is a commonly used solvent for extracting flavors and fragrances from natural sources like fruits, flowers, and spices. Ethyl acetate is considered safe for use in food applications as it is non-toxic and has a low odor & taste.

As per the Careerizma, the food processing business accounts for around \$130 billion from overall Indian food and beverage industry. It contributes 10% of agricultural GDP and 12% of manufacturing GDP. Thus, the increasing demand for process solvents is expected to boost the India ethyl acetate market during the forecast period.

India ethyl acetate market, by end-use industry

By end-use industry, the pharmaceuticals segment dominated the India ethyl acetate market in terms of revenue in 2021. The pharmaceutical industry frequently uses the versatile solvent ethyl acetate to produce a range of medications, including antibiotics, analgesics, and anti-inflammatory drugs. Active pharmaceutical ingredients and other substances that are insoluble in water can be dissolved with special success using this method. In order to extract natural substances from plant materials for use in pharmaceutical goods, ethyl acetate is also employed. It is frequently used to remove alkaloids, essential oils, and other active substances from medicinal plants.

Ethyl acetate is used as a purification solvent in the pharmaceutical industry to remove impurities and contaminants from pharmaceutical compounds. It is a mild solvent that can dissolve many types of impurities without affecting the purity of the active ingredient. Ethyl acetate is also growing in popularity as a coating material for tablets and capsules to improve their appearance, taste, and stability. It is used as a solvent for various pharmaceutical formulations, including injectables and oral suspensions.

TITANIUM DIOXIDE MARKET-INDIA

According to ChemAnalyst report, “**India Titanium Dioxide Market Analysis: Plant Capacity, Production, Operating Efficiency, Demand & Supply, End-User Industries, Sales Channel, Regional Demand, Company Share, Foreign Trade, FY2015-FY2032**”, The India Titanium Dioxide Market is likely to grow at a CAGR of 3.97% during the forecasted period by FY2032. The end-use industries Paints & Coatings, Plastic & Polymers, and Others are anticipated to boost the demand for Titanium Dioxide in India in the upcoming years. Titanium dioxide (TiO₂) is derived from the mineral ilmenite (FeO.TiO₂), which can be found in the metamorphic, igneous rocks and beach sands of India. India has huge reserves of ilmenite and rutile, majorly located in the coastal regions of Tamil Nadu, Andhra Pradesh, Kerala, and Odisha. Titanium Dioxide (TiO₂) is a white permanent pigment popularly used as a raw material in several downstream industries such as paints, paper, toothpaste, plastics, inks, etc. TiO₂ can be further categorized into its polymorphic forms- Anatase, Rutile, and Brookite. Of the three, only Anatase and Rutile hold commercial importance. Rutile TiO₂ is comparatively more durable and stable with efficient light scattering properties than Anatase pigments which are less durable and are commonly used in low-quality dispersion paints, self-cleaning paints, and in road marking paints. However, Rutile pigments encompass a much broader application portfolio and cover almost all paint types. Apart

from paints, Anatase grade is also used in other applications such as plastics, paper, textiles, detergents, printing inks, etc. while Rutile grade is used in the plastics and printing inks sectors.

It offers its most whiteness and opacity when used in paintings. High concealing power, or the capacity to hide or disguise the underlying substrate, is given to paint as a result. No other white pigment does this function as well as it does. The most significant ingredient now employed by the paint industry for whiteness and opacity is titanium dioxide pigment. Thus, Paints & Coatings is the primary driver of the Titanium Dioxide market in India. It is frequently utilised in the paint and coatings industry because it scatters visible light effectively and adds whiteness, brilliance, and opacity to coatings. The building, construction, and automotive end-user industries are expanding quickly, which is causing a boom in the paints and coatings industry. Apart from that, because of its non-toxic nature and UV absorption properties, TiO₂ is also suitable for use in cosmetics, pharmaceuticals, toothpaste, and even in foodstuffs, which also augments the market. Titanium dioxide (TiO₂) is often used in the cosmetics industry because it provides a high colour context, including greater intensity and brightness, helps absorb oils produced by the skin, and shelters it from UV radiation.

The India Titanium Dioxide Market is segmented based on end-use, sales channel, and region. Based on end-use, the India Titanium Dioxide market is segregated into Paints & Coatings, Plastic & Polymers, and Others. Among these Paints & Coatings is dominating the Titanium Dioxide market. This segment held roughly 60% of the Titanium Dioxide market in FY2022. Titanium dioxide is used in the paint and coatings industry to increase opacity and endurance, to assure the paint's longevity, and maintain freshness.

Geographically, the India Titanium Dioxide Market is segregated into North, South, East, and West. In the historic period of FY2015-FY2022, West India has been dominating the market. In FY2022, West India accounted for approximately 60% of the market. West India has been the frontrunner in the consumption of Titanium Dioxide for a variety of uses due to the presence of significant paints & coatings manufacturers like Asian Paints in states like Gujarat, Rajasthan, and Maharashtra.

OUR BUSINESS STRATEGIES

Our focus is to leverage our core strengths and expand our operations in existing and new markets. With our extensive bouquet of products, we wish to enter unexplored markets and establish ourselves as leading plastic products supplier in West Bengal, Assam, Orissa, Bihar. This will pave the way for us to acquire a larger share in the competitive market. Our goal is to continue providing good quality products to our clients and drive business growth by leveraging our strengths and implementing our following strategies:

Continue to provide one stop solution

Our company shall continue to offer a one-stop solution for the packaging needs of our customers with a comprehensive range of packaging products and services in a single location. This includes a diverse selection of packaging materials like plastic bags, films, tubes, containers, and paper-based products. By providing a complete range of packaging solutions, customers can conveniently find everything they need in one place.

Diversification

Our Company shall continue to endeavor possibilities for exploring new market segments and product portfolios to reach a broader customer base. Our commitment to innovation drives our future endeavors. One such initiative is the import of non-IOCL polymer grades, which is poised to significantly boost our turnover. We also plan to expand our product range further and explore new avenues of growth i.e.

- a) Aluminium Foil of SRF Limited which has uses in the application in household foil, flexible packaging and pharma sector.
- b) Different chemical of Solvay company which has uses and application in Binder, Adhesive, Paints, Solvent, Floor Cleaning etc.

In line with our strategy to enhance our product portfolio, we shall foresee importing these products presently not manufactured by IOCL at a better price to benefit our existing customers and add new customers to the portfolio. The supply of these non-IOCL polymer grade granules is made by limited suppliers in India. This gap in supply of these granules presents a promising chance for our company to expand its offerings and meet the demand. Our group companies have a significant consumption capacity of 972 MTs per month for this grade of granule. Further emphasizing our potential for expanding granules supply within our group companies. Exploring imports and taking steps to fulfill the demand for other grades of granules is a great diversification strategy. Our company has already been importing these other grades of granules in previous years and has decided to increase these imports on a large scale to fulfill the rising demand. This approach allows for increased market reach, and the ability to cater to a wider range of customer needs, ultimately driving business expansion.

Leveraging existing Customer Base

Leveraging our existing customer base to supply new products is a smart strategy as it can help us quickly tap into an established market. It provides a strong foundation to further expand our business in supply of these products. These newly added products will supplement our existing business. We will leverage our existing customers to transition them from their current suppliers to source these products from us. Our focus will be on delivering the best quality and providing superior service to ensure a seamless transition and long-term customer satisfaction. This expansion aims to strengthen our market position and drive growth in our overall business.

Improving the financial efficiency resulting in better cost management

Improving financial efficiency is a critical business strategy that focuses on cost management to enhance company performance. By streamlining financial processes and optimizing resources, our company shall reduce operational costs, increase profitability, and drive growth. This involves analyzing the current cost structure to identify areas for cost reduction, such as renegotiating supplier contracts

and eliminating unnecessary expenses. Implementing a cost management culture and empowering employees to identify cost-saving opportunities can further enhance our financial efficiency. Effective budget management, financial reporting, and continuous improvement are essential components of this strategy, ensuring that our company stays on track with its cost management goals and continuously optimizes financial performance.

Procurement from other suppliers besides dealerships for better margins

Procurement from other suppliers is a business strategy that offers our company more options, better margins, and increased flexibility. By sourcing products from various brands, our company will provide a wider range of options to our customers, attract more customers, and increase sales. It will allow for negotiation of better prices and margins, leveraging competition among suppliers. This strategy shall enable us to diversify our product offerings, manage inventory more effectively, and reduce the risk of over-reliance on a single brand. It shall foster stronger customer relationships, enhance customer loyalty, and drive repeat business. Moreover, it shall open opportunities for innovation and differentiation, helping our company to stand out in the market and build a strong reputation.

Customer Relationship Management

To build strong and long-lasting customer relationships, prioritize excellent customer service, personalized solutions, and timely delivery. Additionally, investing in Customer Relationship Management (CRM) systems can greatly enhance our overall customer experience. CRM systems help gather valuable feedback from customers, allowing us to make necessary improvements, and ultimately maintain their loyalty. By focusing on these aspects, our company can cultivate lasting relationships with our customers, leading to increased satisfaction and repeat business.

OUR PRODUCTS

Our product portfolio includes Plastic Granules, Plastic films, Ink, Master Batch, Adhesives, Ethyl, etc. required to produce plastic packaging bags. A brief of the same is given below:

1. Plastic Granules

Plastic granules, also known as plastic pellets or resin, play a crucial role in the manufacturing of diverse plastic products. These small, granular plastic particles are typically derived from either virgin or recycled plastic materials, offering a variety of shapes, sizes, and colors. With extensive applications across industries such as packaging, automotive, construction, electronics, and consumer goods, plastic granules are widely utilized. The production process involves melting and extruding plastic materials into lengthy strips that are subsequently chopped into smaller pellets or granules. These granules are then packaged and sold to manufacturers, serving as essential raw materials for creating a wide range of plastic products.

2. Biaxially oriented polypropylene (BOPP) Films

BOPP films (Biaxially Oriented PolyPropylene Films) are produced by stretching polypropylene film in both the machine direction and the transverse direction. They find extensive applications in packaging, labeling, and lamination. BOPP films are widely recognized as the preferred substrate for food packaging worldwide due to their inherent moisture barrier properties, sealability, high clarity, graphic reproduction, and shelf appeal. They offer the best possibilities for the packaging to be a mono-layer or have a homogeneous structure. Various types of BOPP films are available, catering to different requirements and specifications:

a) HS BOPP

BOPP heat-sealable film is extensively utilized in packaging, printing, and laminating for both food and non-food applications. It possesses heat-sealable properties on both sides and is specifically designed to accommodate high-speed packaging machines. These films find application in various packaging scenarios such as teabag boxes, cigarette boxes, cassettes, CD bundles, and more. Despite being thin, they provide robust and sustainable packaging for the products they encase. Noteworthy features of these films include exceptional transparency, flexibility, high stretchability, dimensional stability, aureole treatment on one or both sides, and waterproof properties, ensuring the safety of the packaged goods.

b) MATT BOPP

Matte BOPP film typically refers to biaxially oriented polypropylene film with a matte effect on one or both sides. In packaging applications, one-side matte BOPP film is the most commonly used variation. By default, when referring to matte BOPP film, it implies one side is matte while the other side is glossy, and both sides are corona treated. This film offers excellent matte appearance, contact clarity, slip, and antistatic properties. The matte side is specially designed for optimal anchoring of UV curable inks and coatings, while the treated glossy side ensures excellent adhesion of lamination adhesive. It exhibits exceptional machinability and is suitable for various lamination machines. It is ideal for laminating printed paper boards, posters, book covers, and other applications where a superior matte appearance is desired.

c) GLOSSY / PLAIN / PRINTING GRADE BOPP

It is an ideal solution for double-sided printing. These films are commonly employed in applications such as brochures, shopping bags, textbooks, leaflets, and more. They offer high transparency and gloss, excellent mechanical properties, and effective scratch prevention. Additionally, they exhibit good permeability and provide a barrier against oxygen and oil. These films ensure excellent ink size stability and possess symmetrical thickness. Typically used for lamination after printing, they enhance the gloss and durability of paper covers, such as books and wine boxes.

d) TAPE AND TEXTILE BOPP

Tape & Textile BOPP film is a plain film made of bi-axially oriented polypropylene. One side of the film is corona treated while the other side remains untreated. BOPP tape film is widely used for self-adhesive tape applications. To ensure long-lasting surface treatment, flame treatment is often employed. Textile BOPP film finds application in packaging textile garments such as shirts and sarees. These films are typically transparent and selectively printed. When packaging bulky items like

blankets, high seal strength is necessary. Generally, tape and textile films undergo treatment on only one side.

e) PEARLISED BOPP

BOPP pearlized film offers various benefits such as increased packaging efficiency, reduced manpower requirements, cost savings, waterproofing, resistance against dirt and breakage, and effective insulation and protection of products. It is suitable for direct use in ice cream, cold drink, and other beverage packaging. Additionally, it serves as an excellent choice for pillow packaging of candies, chocolates, and soap. The 30 μ m thickness of double-sided sealing BOPP pearl film is widely utilized in packaging biscuits, sweets, candies, snacks, and more.

3. Polyester Films

Polyester films, derived from polyethylene terephthalate (PET) resin, are a type of plastic film. PET, a versatile thermoplastic polymer, is renowned for its exceptional physical and mechanical properties. Polyester films exhibit notable characteristics including high tensile strength, dimensional stability, transparency, and resistance to moisture, chemicals, and UV radiation. They find widespread use in flexible packaging, labels, electronic displays, solar panels, and insulation materials. Moreover, polyester films can be coated or laminated with other substances to enhance properties like barrier capabilities, adhesion, and printability.

4. Cast Polypropylene (CPP) Films

Cast Polypropylene (CPP) is an unoriented film, offering enhanced impact resistance and suitability for low temperatures. It has gained popularity widely in medical and pharmaceutical industry as a replacement for polyethylene in numerous traditional flexible packaging applications. CPP stands out due to its superior clarity, gloss, heat resistance, and lay-flat characteristics. The film properties of CPP can be customized to meet specific packaging, performance, and processing needs. Overall, CPP exhibits higher tear and impact resistance, improved performance in cold temperatures, and excellent heat-sealing properties.

Difference between BOPP, Polyester and CPP films.

BOPP (Biaxially Oriented Polypropylene), polyester, and CPP (Cast Polypropylene) films are widely used in the packaging industry, but they differ in production process, material properties, applications, and barrier properties.

1. *Production Process:* BOPP and polyester films are both produced using a biaxial orientation process, whereas CPP films are produced using a cast extrusion process.

2. *Material Properties:* BOPP films are known for their excellent stiffness, clarity, and dimensional stability. Polyester films have high tensile strength, puncture resistance, and heat resistance. CPP films are softer and more flexible than BOPP and polyester films, with good sealing properties and high transparency.
3. *Applications:* BOPP films are commonly used in the packaging of food and consumer products, as well as in the labeling and lamination industries. Polyester films are used in applications that require high strength, such as packaging of heavy products, insulation, and electrical applications. CPP films are widely used in the packaging of snack foods, confectionery, and other flexible packaging applications.
4. *Barrier Properties:* BOPP and CPP films have good barrier properties against moisture, oxygen, and other gases, while polyester films have better gas barrier properties, making them suitable for certain applications where high gas barrier is required.

Overall, each type of film has its unique properties and advantages, and the choice of film depends on the specific requirements of the application.

5. Ink

Printing inks are important for providing information and marketing on packaging. They can be used on various packaging materials like plastics, paper, board, and cork. In plastic packaging, inks are used to print details like product information, logos, barcodes, and other important information. It is crucial to use ink that is suitable for the specific plastic material and can stick well to the surface of the plastic film or container. This ensures that the printed information is clear, durable, and stays intact on the packaging.

Also, Offset printing ink, used in high-volume printing, is a paste-like substance made of pigments for color and a vehicle—a blend of oils, resins, and solvents—for adhesion and drying. During printing, the ink adheres to image areas on a plate, is then transferred to a rubber blanket, and finally applied to the printing surface. The ink must dry quickly, facilitated by solvent evaporation and paper absorption. The process typically uses cyan, magenta, yellow, and black (CMYK) inks to create a broad color spectrum.

6. Titanium Dioxide

Titanium dioxide is extensively utilized as a pigment in printing inks. It plays a crucial role in white inks, providing excellent opacity and hiding power to effectively cover the underlying substrate, making the printed content more visually appealing. Additionally, titanium dioxide is employed in colored inks to enhance their color intensity and brilliance, resulting in more vibrant and attractive printed materials.

7. Master Batch

Masterbatch (MB) is a solid additive that serves the purpose of coloring (color masterbatch) or enhancing other properties (additive masterbatch) of plastic materials. It is produced through a process called encapsulation, where a concentrated blend of pigments and/or additives is mixed with a carrier matrix resin using heat or twin-screw extrusion. The resulting mixture is cooled and then cut into granules. Masterbatch provides an economical solution for coloring raw polymer, allowing processors to achieve desired colors efficiently and cost-effectively.

8. Solventless Adhesives

Solventless adhesives are a type of glue that doesn't contain any harmful chemicals called solvents. Solvents are substances that help dissolve or thin out other substances, but they can be harmful to the environment and human health. Solventless adhesives, on the other hand, use different methods to bond materials together without the need for solvents. They often rely on chemical reactions or heat to create a strong and durable bond. These adhesives are considered safer and more environmentally friendly compared to adhesives that use solvents.

Solventless adhesives are widely used in industries such as packaging, automotive, construction, electronics, medical, and aerospace. They provide strong bonding without the use of harmful solvents, ensuring safer and more environmentally friendly adhesive solutions. Solventless adhesives are employed for applications including flexible packaging, automotive component bonding, construction materials, electronics assembly, medical device manufacturing, and aerospace composites, offering reliable and durable bonding properties in these sectors.

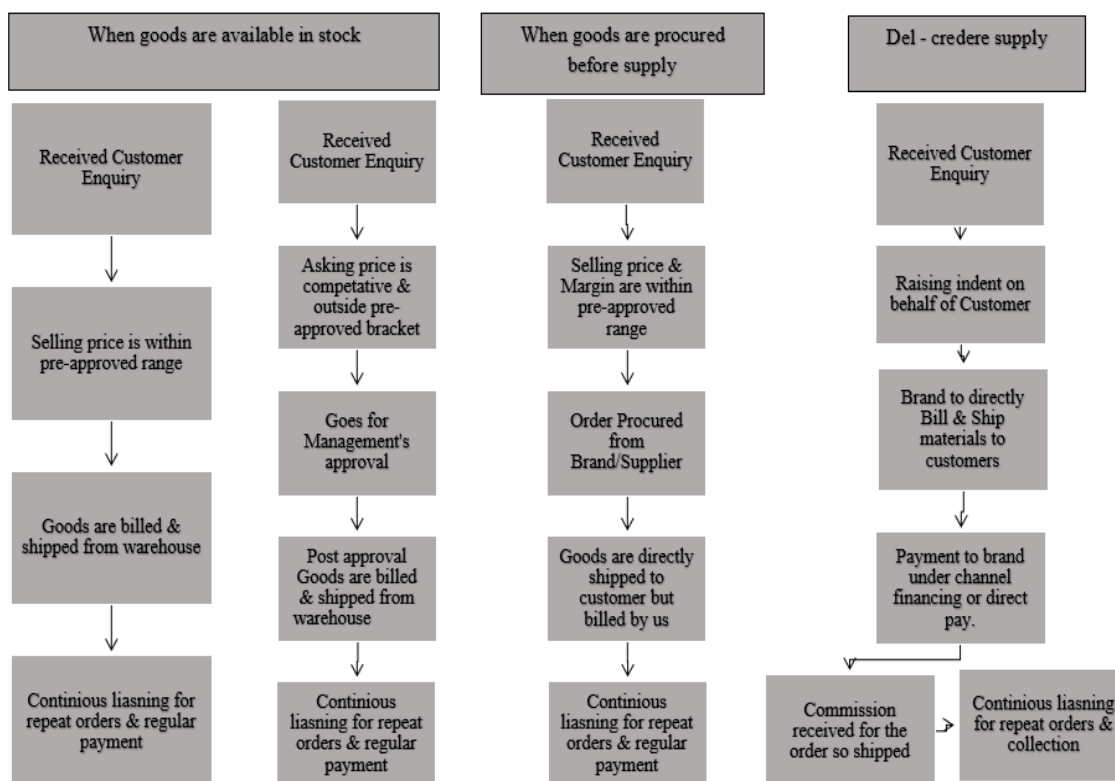

9. Ethyl Acetate

Ethyl acetate is a highly flammable, colorless liquid widely used as a solvent in different industries, including ink production for packaging materials. It is favored for its low toxicity, low boiling point, and strong solvency for resins and polymers. Its moderate evaporation rate prevents ink from drying out too fast. Ethyl acetate serves as an effective solvent, ensuring proper ink application and drying time in packaging printing, enabling vibrant and long-lasting results.

COMPETITION

Competition within the plastic-based trading and dealership business is fierce and dynamic. Due to this industry’s unorganized and fragmented nature with many small and medium-sized companies, there is no authentic data available to our Company on total industry size and markets share of our Company vis-a-vis the competitors. In the trading of plastic goods, the industry is largely unorganized with minimal entry barriers, leading to a lot of players in the market. This saturation, coupled with price-conscious consumers, intensifies the competition as businesses constantly strive to offer the lowest prices to attract and retain customers. Meanwhile, in the dealership segment, the landscape is crowded with numerous distributors representing the same brands, as well as competing with products from major players like Reliance Polymers and Jindal Polyfilms and so on. As a result, success in both these domains requires not only competitive pricing but also effective marketing, customer service, and differentiation strategies to stand out in this bustling marketplace.

A. STATUTORY AND COMMERCIAL LAWS

The Companies Act, 2013 & Companies Act, 1956

The Companies Act, 2013, has replaced the Companies Act, 1956 in a phased manner. The Companies Act, 2013 received the assent of President of India on 29th August 2013. At present, almost all the provisions of this law have been made effective except few to which extend the Companies Act, 1956 is still applicable. The Ministry of Corporate Affairs has also issued rules complementary to the Companies Act, 2013 establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Companies Act, 2013. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Companies Act, 2013 prescribes regulatory mechanism regarding all relevant aspects including organizational, financial and managerial aspects of companies.

Indian Contract Act, 1872

The Indian Contract Act, 1872 (“**Contract Act**”) codifies the way in which a contract is entered, executed and implemented and implications of breach of a contract. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced, as amended from time to time. It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. The Contract Act deals with the enforcement of these rights and duties upon the parties. The Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the Act are now subject matter of separate enactments viz., the Sale of Goods Act, 1930 and the Indian Partnership Act 1932. The objective of the Contract Act is to ensure that the rights and obligations arising out of a contract are honoured and that legal remedies are made available to those who are affected.

The Sale of Goods Act, 1930

The law relating to the sale of goods is codified in the Sale of Goods Act, 1930 (“**SG Act**”). It defines sale and agreement to sell as a contract whereby the seller transfers or agrees to transfer the property in goods to the buyer for a price and provides that there may be a contract of sale between part owner and another and that the contract of sale may be absolute or conditional. According to the provisions of the SG Act, a contract of sale is made by an offer to buy or sell the goods for a price and the acceptance of such offer. The SG Act further provides that the contract may provide for the immediate delivery of the goods or immediate payment of the price or both or for the delivery or payment by instalments or that the delivery or payment or both shall be postponed. Provisions are made in the SG Act for existing or future goods, perishable goods, ascertainment of price, conditions and warranties, effects of the contract, delivery to courier, duties of seller and buyer, buyer’s right of examining the goods, liability of buyer for neglecting or refusing the delivery of goods, rights of unpaid seller, suits for breach of the contract, sale, etc.

Competition Act, 2002

The Competition Act, 2002 (“**Competition Act**”) prohibits anti-competitive agreements, abuse of dominant positions by enterprises and regulates “combinations” in India. The Competition Act also established the Competition Commission of India (“**CCI**”) as the authority under the Competition Act. The provisions of the Competition Act relating to combinations were notified recently on 4th March, 2011 and came into effect on 1st June, 2011. Combinations which are likely to cause an appreciable adverse effect on competition in a relevant market in India are void under the Competition Act. A combination is defined under Section 5 of the Competition Act as an acquisition, merger or amalgamation of enterprise(s) that meets certain asset or turnover thresholds. There are also different thresholds for those categorized as individuals and group. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is likely to have an appreciable adverse effect on competition in India. Effective from 1st June, 2011, all combinations have to be notified to the CCI within thirty (30) days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and Section 5(b) of the Competition Act (including any binding document conveying an agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities) approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. The obligation to notify a combination to the CCI falls upon the acquirer in case of an acquisition, and on all parties to the combination jointly in case of a merger or amalgamation.

Consumer Protection Act, 2019

The Consumer Protection Act, 2019 (“**Consumer Act**”), has repealed Consumer Protection Act, 1986 and provides for the protection of interest of the consumers and the settlement of disputes raised by the consumers. No. J-9/1/2020-CPU dated July 15, 2020 as issued by the Central Government. The Consumer Act sets out a mechanism for consumers to file complaints against, *inter alia*, service providers in cases of deficiencies in services, unfair or restrictive trade practices and excessive pricing. A three-tier consumer grievance redressal mechanism has been implemented pursuant to the Consumer Act, at the national, state and district levels. Further, the Consumer Act established a Central Consumer Protection Authority to promote, enforce and protect the rights of consumers. If the allegations specified in a complaint about the services provided are proved, the service provider can be directed to *inter alia* remove the deficiencies in the services in question, return to the complainant the charges paid by the complainant and pay compensation, including punitive damages, for any loss or injury suffered by the consumer. The Controller of Legal Metrology Department is the competent authority to grant the license under the LM Act. Any manufacturer dealing instruments for weights and measuring of goods must procure a license from the state department under the LM Act.

The Legal Metrology (Packaged Commodities) Rules, 2011 (“**Packaged Commodities Rules**”) were framed under Section 52(2) (j) and (q) of the LM Act and lay down specific provisions applicable to packages intended for retail sale, wholesale and for export and import. A “pre –packaged commodity” means a commodity which without the purchaser being present is placed in a package of a pre-determined quantity. The key provisions of the Packaged Commodities Rules provide that it is illegal

to manufacture, pack, sell, import, distribute, deliver, offer, expose or possess for sale any pre-packaged commodity unless the package is in such standard quantities or number and bears thereon such declarations and particulars as prescribed. Further, all pre-packaged commodities must conform to the declarations provided thereon as per the requirement of Section 18(1) of the LM Act and no pre-packaged commodity shall be packed with error in net quantity beyond the limit prescribed in the first schedule of the Packaged Commodity Rules. The Packaged Commodity Rules were amended in the year 2017 to increase protection granted to consumers. Some recent additions include increased visibility of retail price, removal of dual maximum retail price and bringing e-commerce within the ambit of these rules.

The Goods and Services Tax Act, 2017 (“**GST**”) is one of the most significant tax reforms introduced in the history of the Indian fiscal evolution. However, in the case of imports and inter- state supplies, an Integrated Goods and Service Tax (“**IGST**”) shall be levied by the central government, proceeds of which will be shared by the central and the recipient state government. IGST is an Indian innovation which would help tax move along with goods/services, across states and therefore reduce refund situations at state borders. GST is expected to bring a significant shift from origin-based taxation to a destination-based tax structure. This is likely to impact not only the operating business models but also the revenues of the centre/states. It has the potential to impact cash flow, pricing, working capital, supply chain and IT systems and hence provides an opportunity to transform your business. GST allow equal opportunity to the centre and the state to tax all supplies of goods and services. The single GST replaced several former taxes and levies which includes central excise duty, services tax, additional customs duty, surcharges, state-level value added tax and octroi.

Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

h. DEPRECIATION AND AMORTISATION

Depreciation is calculated using the Straight line value method over their estimated useful lives.

i. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

j. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised

k. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan:The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

I. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

n. TAXATION:

Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

Investment property:

An Investment in Land or Building, which is not intended to be occupied substantially for used by, or in operations of, the company, is classified as Investment Property. Investment Properties are stated at cost less diminution in value (other than temporary).

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Purv Flexipack Limited (Formerly Known As Purv Flexipack Private Limited)

NOTES TO THE RESTATMENT

h. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Purv Flexipack Limited (Formerly Known As Purv Flexipack Private Limited)

NOTES TO THE RESTATEMENT

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity. Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. BORROWING COST

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

KEY FACTORS THAT MAY AFFECT OUR RESULTS OF OPERATION

Our results of operations have been, and will be, affected by many factors, some of which are beyond our control. Our results of operations and financial conditions are affected by numerous factors including the following:

A. Ability to expand the customer base and develop new products and generate new sales.

Customer relationships are the core of our business. Our ability to grow our customer base and drive market adoption of our products is affected by the pace at which the demand of our products grows. We expect that our revenue growth will be primarily driven by the pace of adoption of our offerings. This will drive our ability to acquire new customers and increase sales to existing customers, which in turn, will affect our future financial performance.

We have grown our operations by introducing quality products to meet potential requirements of our customers and create market for our products. To service and grow our relationships with our existing customers and to win new customers, we are required to provide them with products that address their quality and other requirements, to anticipate and understand trends in their relevant markets and to continually address their needs as those change and evolve.

Our future growth shall depend on our ability to identify emerging market trends, offer new

products to customers, inculcate strong culture of innovation, have trained workforce and latest research and development facilities to enable us to expand the range of our offerings to customers and improve the delivery of our products along with growing our portfolio of various products to increasingly represent our revenue from operations, widened the customer base that we cater to, and typically have a higher margin profile.

B. Pricing pressure from customers may affect our gross margins.

Our ability to remain competitive and profitable depend on our ability to source and maintain a stable and sufficient supply of raw materials at cost effective prices. Historically, prices of basic raw material costs have increased such as Gas and petroleum products which have a significant effect on the cost of our finished goods and consequently our gross margins. We depend on external suppliers for our materials on a purchase order basis and place such orders with them in advance on the basis of our anticipated requirements. As a result, the success of our business is significantly dependent on maintaining good relationships with our suppliers. For further information on procurement of our raw materials, see “*Our Business*” on page 167.

C. Reliance on Customer Relationships

The identity and correspondingly revenues from any customer or our top five customers may vary between financial reporting years depending on the nature and term of ongoing contracts with such customers. For the period ended September 30, 2023, and for the financial year ended on March 31, 2023, March 31, 2022, and March 31, 2021, our top five customers across our business accounted for Rs. 1602.55 lakhs, Rs 4511.48 lakhs, Rs 4134.88 lakhs, Rs 2547.33 lakhs and 29.15%, 28.72% ,24.18% and 24.92% of our revenue from operations, respectively, while our largest customer accounted for Rs 1484.42 lakhs, Rs 1087.53 lakhs, and Rs 630.82 lakhs, respectively, of our total revenue from operations in such periods. Thus, our Company is reliant on key customers for our business and therefore any adverse developments in our relationships with our key customers or a significant reduction in business from any such key customer may adversely impact our results of operations, prospects and financial condition.

D. Sales and Marketing

We have deployed a team of efficient and dedicated marketing professionals for the marketing and promotion of our products. Our marketing team constantly monitors and scours the trends in the market. Regular interaction is required to maintain the client base and to gain insight into the specification needs of the diverse clientele. We constantly seek to grow our product reach to underpenetrated geographies, increase the penetration of our products in markets in which we are currently present and widen the portfolio of our products available in those markets by growing our network. Our success is dependent on our ability to enter and expand our network in new markets which is further dependent on our familiarity with the economic condition, customer base and commercial operations in new regions. With limited presence, our ability to gain market share is also dependent on our ability to compete with companies that may have an existing strong presence.

However, we may not be successful in expanding our network or increasing our market presence. Further, we may also face disruptions in selling our products for various reasons such as transportation bottlenecks, raw material inaccessibility, competition activities, labor issues, natural disasters, etc. which may result in disruptions to our business.

E. Changes in laws and regulations relating to the industry in which we operate

The Packaging industry in which we operate is subject to constant change. Packaging is among

the high growth industries in India and developing @ 22-25% per annum. A high degree of potential exists for almost all user segments which are expanding appreciably -processed foods, hard & soft drinks, fruit and marine products. Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour related laws and regulations which governs the discharge, emission, storage, handling and disposal of variety of substances that may be used in or result from the operations of our business.

F. Increasing competition in the industry

The industry in which we operate is highly competitive. Factors affecting our competitive success include, amongst other things, price, demand for our products, availability of raw materials and reliability. Our competitors vary in size, and may have greater financial, production, marketing, personal and other resources than us and certain of our competitors may have longer history of established businesses and reputation in the Indian packaging industry as compared to us. Competitive conditions in some of our segments have caused us to incur net selling prices and reduced gross margins and net earnings. This condition may continue indefinitely. Our failure to compete effectively, including any delay in responding to any changes in the industry and market, may affect competitiveness of our products, which may result in a decline in our revenues and profitability.

G. Changes in fiscal, economic, or political conditions in India

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business operations, financial performance and the market price of our Equity Shares are affected by interest rates, government policies, taxation, social and ethnic instability, and other political and economic developments affecting India.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition along with the price of the Equity Shares.

H. Default or delay in payment by a significant portion of our customers, may have an adverse effect on cash flows, result of operations and financial conditions.

We may encounter problems in executing the orders in relation to our products on timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause it cancellation. Due to the possibility of cancellation or changes in scope and schedule of delivery of such products resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or in full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued the SEBI UPI circulars in relation to streamlining the process of public issue of, among others, equity shares. Pursuant to the SEBI UPI Circulars, the UPI mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for Bids by UPI Bidders through designated intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment Mechanism, the SEBI UPI Circular have introduced the UPI Mechanism in three phases in the following manner:

- **Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the ASBA Form with any of the designated intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continue to be six Working Days.
- **Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI, vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by UPI Bidders through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.
- **Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20/- to Rs. 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bid from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Applied Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, the FDI Policy, FEMA and rules and regulations made thereunder. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the RBI and the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“DPIIT”).

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT has issued a consolidated FDI Policy, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. Investment by Non-Resident Entities in India under FDI Policy 2020:

The FDI Policy 2020 provides that a non-resident entity can invest in India, subject to the FDI Policy except in those sectors/activities which are prohibited. However, an entity of a country, which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, can invest only under the Government route. The same is in line with the Press Note No. 3(2020 Series) dated April 17, 2020 as issued by the Department for Promotion of Industry and Internal Trade, Ministry of Commerce & Industry, Government of India and Foreign Exchange Management (Non-debt instrument) Amendment Rules, 2020 notified by Central Government through notification dated April 22, 2020 in order to curb opportunistic takeover/acquisition of Indian Companies due to current COVID-19 pandemic conditions.
