INTERNAL RISK FACTORS

Business Specific/ Company specific Risk

1. **Changes in market trends, fashion and consumer preferences and increase in competition that are largely beyond our control could adversely affect our business, financial condition, results of operations and prospects.**

The fashion industry is very sensitive to change as per the market trends. Any change in the latest fashion can render the old stock obsolete and increase in competition with close competitors will reduce the demand. Also factors such as change in trend, fashion and customer preference are generally beyond our control. Some or all of our concepts may become less attractive in light of changing consumer preferences or better design by competitors, and we may be unable to adapt to such changes in a timely manner. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations and prospects.

2. **We are highly dependent upon a limited number of suppliers. 66.68%, 52.04%, 49.81% and 53.71% of our Total Purchases are derived from our top 10 suppliers for the period ended on September 30, 2023, and Fiscal Years ended on March 31, 2023, 2022 and 2021. Further our 42.56%, 8.85%, 18.42%, and 27.39% of our total purchases for the period ended on September 30, 2023, and Fiscal Years ended on March 31, 2023, 2022 and 2021 are procured from our group companies. Any failure of our suppliers to deliver these products in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time at the desired level of quality.**

We source our product requirement indigenously. Purchases made from top 10 suppliers for the period ended September 30, 2023, and the Fiscals Years 2023, 2022 and 2021 are as follows:

Further, our company also procure raw material from our group companies namely Signoria

While we confirm that all the related party transactions done by our company in the past have been executed on Arm's Length Price and were in compliance with provisions of the Companies Act, 2013 as amended and other applicable laws, but we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties and there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. For further details in relation to transactions with related parties, please refer to the section entitled **"Related Party Transactions"** on page 186.

We may find additional suppliers to supply these products, any failure of our suppliers to deliver these products in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time at the desired level of quality. As a result, we may lose customers which could have a material adverse effect on our business, financial condition, and results of operations.

Further our product supply and pricing may become volatile due to several factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure that we will be able to procure adequate supplies of our products in the future, as and when we need them on commercially acceptable terms. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

3. ***We derive 70.46%, 66.15%, 51.60% and 47.17% of our revenue from top 10 customers during the period ended on September 30, 2023, and fiscal ended on March 31, 2023, 2022 and 2021. If one or more of such customers choose not to source their requirement from us, our business, financial condition and result of operation may be adversely affected.***

We significantly depend on a few major customers for our revenues. Contribution of revenue from top 10 customers is tabulated below:

(₹ in Lakhs)

Particular	As on September 30, 2023	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
Revenue from operations	652.85	1,914.92	1,181.60	585.23
Revenue from top 10 customers	460.04	1,266.69	609.69	276.03

Particular	As on September 30, 2023	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
% of total revenue	70.46%	66.15%	51.60%	47.17%

Note: Pursuant to the certificate dated February 21, 2024 issued by Statutory Auditor of the company, M/s Vinod Singhal & Co. LLP, Chartered Accountants.

We significantly depend on our selective customers for major portion of our sales and any loss of any of the customers for any reason (namely, failure to negotiate on acceptable terms, dispute with customers, adverse change in financial condition of such customers like bankruptcy or liquidation or other financial hardship, merger or decline in their sales, reduced or delayed customer requirements, plant shutdown, labour strikes or other work stoppages), could have an adverse effect on our business, results of operation and financial condition. We focus on building sustained and long-term relationship with our customers and constantly endeavour to cater their needs with our products. Though we have a long-term relationship with these customers, but we cannot assure that this relationship will continue in future also. In addition to these external factors these key customers may also set off any payment obligations, require indemnification for themselves or their affiliates, replace us with our competitors or replace their existing products with alternative products which we do not supply. Therefore, there can be no assurance that we will not lose all or a portion of sales to these customers or that we will be able to offset any reduction of prices to these customers with reduction in our costs or by obtaining new customers. We may remain dependent upon our key customers for substantial portion of our revenue. The deterioration of the financial condition or business prospects of these customers could reduce their requirement of our product and result in significant decrease in revenue we derive from these customers. In the event of our failure to retain one or more of our customers it will have an adverse effect on our financial performance and result of operation.

4. ***We do not have long term agreements with suppliers for our raw materials and packaging material and an increase in the cost of, or shortfall in the availability or quality of such raw materials and packaging material could have an adverse effect on our business, financial condition and result of operation.***

We do not enter into any long-term supply contract with any of our raw material suppliers and typically source raw materials from third party suppliers under contracts of shorter period or from the open market. The absence of long-term contract with other parties except as herein before mentioned at fixed prices exposes us to volatility in the prices of raw material, which may reduce our profit margins. We may face a risk that one or more of our suppliers may discontinue their supplies to us, and any inability on our part to procure raw material from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our business, financial condition and result of operations.

During the Period ended September 30, 2023, and last 3 fiscal years ending on March 31, 2023, March 31, 2022 and March 31, 2021, our cost of material consumed amounted to Rs. 549.80 lakhs, Rs. 1,242.08 lakhs, Rs. 1,008.37 lakhs, Rs. 552.71 lakhs respectively as a percentage of our gross revenue from operations was 84.21%, 64.86%, 85.34% and 94.44% respectively. We source the raw materials that we use in our business from the domestic market.

5. ***Our reliance on six major products comprises the substantial sales and any factor affecting the sales of these major products could have an adverse effect on our business.***

Our business involves the sale of six major products namely Kurti, Pant, Dupatta (in 3 Pcs, 2 Pcs and 1 Pc), Gown, Top and Co-Ord set. The table below provides gross revenue from operations contributed by each of our products in last Period ended September 30, 2023, and for the year ended March, 2023, March, 2022 and March, 2021 are as under:

Factors affecting these product segments in general, or any of our customers in particular could have a cascading adverse impact on our business financial condition and results of operations. Such factors include, but are not limited to the following:

- Change in any registration requirement or non-renewal of registration or imposition of a regulatory ban, or trade sanctions imposed across the country or any such restrictions on the business or product or customer's final product.
- Loss of market share, which may lead our customers to reduce or discontinue the purchase of our products.
- Economic conditions of the market in which our customers operate.
- Regulatory issues faced by the women apparel industry.
- Downturn or industrial cycle that impact demand
- Changes in technology or consumer tastes and requirement that alter demands for our products.

For any of the above reasons or any other reason whatsoever, in the event of the sales to our customers substantially decrease, our business financial condition and the result of operations could be adversely affected.

6. We operate in a highly competitive and fragmented industry.

The apparel manufacturing industry is highly competitive and fragmented. Our competitors include numerous apparel designers, manufacturers, and other established companies. Some of our competitors are larger and therefore better placed to take advantage of efficiencies created by size, and have better financial resources or greater access to capital at lower costs, and may be better known nationally. Moreover, as the industry is highly fragmented, we also face competition from local stores, who may, for a variety of reasons such as easier access and personal relationships with the customers, be able to cater to local demands better than us. The principal competitive factors in the apparel industry are brand name, brand identity, timeliness, reliability and quality of products, price and our ability to anticipate consumer demands and maintain appeal of products to customers. If we do not maintain our brand names and identities and fail to provide high quality and reliable products on a timely basis at competitive prices, or if our competitors are able to compete more effectively, we may not be able to maintain our competitive edge. If we are unable to compete successfully, we could lose our customers, which would negatively impact our sales and

financial performance. Further, the competitive nature of the apparel industry may result in lower prices for our products and decreased gross profit margins, either of which may materially adversely affect our sales and profitability.

7. *Properties, on which we have our registered office and manufacturing facilities, are not owned by us. Any termination or dispute in relation to this lease/ rental agreement may have an adverse effect on our business operations and results thereof.*

The properties where our registered office & manufacturing unit-I situated at 324, Ayekar Nagar II, Near RICCO Industrial Area, Mansarovar, Jaipur, Rajasthan – 302020 has been taken on lease from the Mahesh Kumar Bhagchandani.

The agreements are renewable on mutually agreed terms. The rent agreements have a clause for the renewal of the same for a further period as may be mutually agreed among the parties after the expiry of the current period. In the event of the said agreements are not being renewed or agreement is terminated by either of the parties or upon expiry of the said agreement or increase in rent or any non-compliance, we may have to either vacate the registered office and manufacturing facility and relocate to another premises or agree to pay the extra amount for using the same prices. Further, increase in rent structure will lead to increase of our expenditure which in turn will lead to decrease of revenue and increase of operational cost. Also, searching for the suitable location, setting the registered office and manufacturing facility from the scratch and relocating the inventory may lead to loss of clients, reduction in sales thereby affecting our profitability.

8. *There are pending litigations against our company and certain Directors and any adverse decision in these proceedings may render us/them liable to liabilities/penalties and may adversely affect our business, result of operations and financial conditions.*

Our Company, our Promoters and Directors are involved in certain legal proceedings at different levels of adjudication before various courts, tribunals and appellate authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties by other statutory authorities, our Company or Directors may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities and also adversely affect our reputation.

In the ordinary course of business, our Company, promoters and our directors are involved in certain legal proceedings, which are pending at varying levels of adjudication at different forums. The summary of outstanding matters set out below includes details of civil proceedings, criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving our company, directors and promoters of our Company.

According to the materiality policy, any outstanding litigation, other than criminal proceedings, statutory or regulatory actions and taxation matters, is considered material if the monetary amount of claim by or against the entity or person in any such pending matter is in excess of Rs. 5,00,000 or if an adverse outcome of any such litigation could materially and adversely affect our business, prospects, operations, financial position or reputation.

We cannot assure that any of the legal proceedings described below will be decided in favor of the company and or directors respectively. Further the amounts claimed in these proceedings have been disclosed to the extent ascertainable, excluding contingent liabilities and include amounts claimed jointly and severally. Should any new developments arise, such as change in Indian law or rulings by appellate courts or tribunals, additional provisions may need to be made by us, the promoters and directors in our respective financial statements, which may adversely affect our business, financial condition and reputation. We may incur significant expenses and management

time in such legal proceedings. Decision in any such proceedings adverse to our interests may have adverse effect on our business, future financial performance and results of operations.

Decision of such proceedings which are against the interests may affect our reputation and may have material and adverse effect on our business, results of operations and financial condition.

We may incur substantial costs, including clean up and/or remediation costs, fines and civil or criminal sanctions, as a result of violations of or liabilities under health and safety laws, which may have a material adverse effect on our business or financial condition. We cannot assure you that approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Note: Pursuant to the certificate dated February 21, 2024 issued by Statutory Auditor of the company, M/s Vinod Singhal & Co. LLP, Chartered Accountants.

A significant portion of our working capital is utilized towards trade receivables and inventories. As on September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021, our inventories and trade receivables form 95.22%, 96.66%, 93.04% and 87.94% respectively, of total current assets based on restated financial statements.

We intend to continue growing by expanding our business operations. This may result in increase

in the quantum of current assets particularly trade receivables and inventories. The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications.

Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapters titled *“Objects of the Issue”* and *“Management Discussion and Analysis of Financial Condition and Results of Operation”* beginning on pages 91 and 223, respectively.

12. Our company has negative cash flow from operating activity, investing activity and financing activities in some of the previous years as per the restated financial statement.

Inability to generate sufficient cash in future can have negative impact on business and financial operations. For further information, see *“Financial Statements as Restated”* and *“Management’s Discussion and Analysis of Financial Condition and Results of Operations”* beginning on pages 188 and 223 respectively.

*Three-month utilization as per annualized figure

Pursuant to capacity utilization certificate dated December 15, 2023 from Narendra Tanwar-N-Associates, Chartered Engineer.

For further details on installed capacities refer section titled **“Our Business - Capacity Utilization”** on page 141. We cannot assure you that we will achieve higher manufacturing capacities than we have achieved in the past and will be able to achieve optimal capacity utilization at our existing manufacturing facilities.

The capacity utilization at our refining facilities is subject to various factors such as timely and adequate supply of raw material, uninterrupted power supply, efficient working of machinery and equipment and optimal production planning, technical support. Higher capacity utilization is critical to achieving higher revenues and profitability. If we are unable to achieve and consistently maintain, higher levels of capacity utilization or if our capacity utilization falls below the current level, our revenues and profitability could be adversely affected. Also, lower manufacturing capacity level could also adversely impact our ability to build our customer base and grow our business.

14. Delays or defaults in payments from our customers could result in reduction of our profits.

In ordinary course of business, we provide our customers certain credit facilities as part of our payment terms. Though we limit the credit we extend to our customers depending upon their payment history and financial condition, we may still experience losses if the customer is unable to

pay. Hence, we are exposed to this credit risk from our operating activities specifically from trade receivables. As at September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021, we had an outstanding trade receivable aggregating Rs. 999.36 lakhs, Rs. 1,145.24 lakhs, Rs. 268.74 lakhs and Rs. 184.32 lakhs respectively, constituting 153.08%, 59.81%, 22.74%, 31.50% respectively, of our revenue from operations during the respective years. Further our trade receivable turnover ratio as on September 30, 2023, March 31 2023, March 31,2022 and March 31, 2021 was 0.18, 1.84, 3.72 and 2.57 respectively. Further as on September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 trade receivables aggregating to Rs. 825.22 lakhs, Rs. 17.95 lakhs, Rs. 2.75 lakhs, Rs. 0.40 lakhs, are those which are more than 6 months.

Hence our result of operation and profitability depends on the credit worthiness of the customers. There is a possibility that any of the customer could have weak credit history so we cannot assure that these parties will pay us in timely manner, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payment to us. Also, any increase in the trade receivable turnover days or write offs will have a negative impact on our business. Any default or delays in payment of receivables by our customers would have an adverse effect on our business' cash flow, result of operations and financial condition.

15. We may suffer a loss of income if our products/designs are duplicated by our competitors.

As our industry is fashion oriented, there is a constant need for updation and innovation. Hence, designs in our industry change on a frequent basis. Our success highly depends upon the adaptability of designs as per the latest trends and the acceptance of the product in the market. If any of our designs hits the market and receive over whelming response, our competitors may tend to copy our design to increase their market share and revenues and take due advantage; thus, hampering our market. The details of number of design of Kurtis for the period ended September 30, 2023 and for the Fiscal ended March 31, 2023, 2022 and 2021 are as under:

Particular	For the period ended September 30, 2023	For the year ended March 31, 2023	For the year ended March 31, 2022	For the year ended March 31, 2021
Number of design of Kurtis	360	958	737	430

Note: Pursuant to the certificate dated February 21, 2024 issued by Statutory Auditor of the company, M/s Vinod Singhal & Co. LLP, Chartered Accountants

Since our designs are not registered, we may not be able to claim our rights over it and could suffer loss of income thereby affecting our operations.

16. Our trademarks are not registered and as such we may not be able to effectively protect our intellectual property.

Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill.

Though the Company had honestly and bonafidly adopted the logo  since the year of 2017 and applied for the registration of trademark with logo  w.e.f. June 13th, 2023. Due to the amendment in the original application dated June 13th, 2023 in the Trade Mark, an application was filed in the Registrar of Trademark, Ahmedabad, on September 4th, 2023 with the new logo  and with the change in the name of the Company from private limited to limited.

The Company had applied for the registration of trademark under four classes namely class 9, class 24, class 25 and class 35 respectively out of which the class 25 is the major class attracting to the main object of the business of the company which has been objected by the Registrar of Trademark under section 11 of the Trademark Act, 1999. Hence, the trademark application in respect of the

main object of the Company is under objection and still to be published in Journal of the Trademark. We can be challenged after publishing our trademark in trademark journal, on the grounds of opposition under the Trademark Act, 1999, from the third party having already registered with the similar or identical name which the Company has applied for the registration in the department of the Trademark. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. This could have a material adverse effect on our business, which in turn could adversely affect our results of the operation.

Our Trademark filed under Class 24, Class 25 and Class 35 were objected in their examination report under the provisions and requirement of Trademark Act, 1999 and the reply of examination report has been filed for Class 25 and class 25. The details of current status of trademark applications are as under:

S. No	Trademark	Class	Registration/ Application No.	Status	Applicable Laws
1		9	5977756	Accepted	The Trade Marks Act, 1999
2		24	5977757	Objected	The Trade Marks Act, 1999
3		25	5977758	Objected	The Trade Marks Act, 1999
4		35	5977759	Objected	The Trade Marks Act, 1999

17. Our Company has unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

As on February 15, 2024 our Company has unsecured loans amounting to Rs.283.99 lakhs from certain individuals and corporates, including promoters and members of promoter group and that are repayable on demand to the relevant lenders. Out of Rs. 283.99 Lakhs, we have availed a loan of Rs. 0.81 Lakhs from a member of our Promoter Group which is a interest free loan. Such loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lenders at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

For further information, see the chapter titled “*Financial Indebtedness*” on page 244.

18. Our cost of production is exposed to fluctuations in the prices of raw material like gray cloth, running dye/printed fabric.

We are exposed to fluctuations in the prices of raw material like gray cloth and running dye/printed fabric and may be unable to control factors affecting the price at which we procure our raw material. We may at times also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers.

Particularly, we face the risk of our products becoming unaffordable for a segment of the demography, if we pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins.

Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

19. Our Group Companies are authorized to carry on similar line of business as that of our Company which may lead to real or potential conflicts of interest for our Promoters or Directors.

As on the date of this Prospectus, our Group Companies namely, Signoria Fashions Private Limited is in the business of garments and Herble Prints Private Limited engaged in the business of printing of cloth. Signoria Fashions Private Limited and Herble Prints Private Limited are authorised by their respective constitutional documents to engage in lines of business similar to that of our Company. Although, as on date of this Prospectus, the aforesaid Group Companies are not into the manufacturing of the same products as our Company, future conflicts of interests may arise in allocating business opportunities among our Company and Group Companies in circumstances where our respective interests diverge. Our Promoters, Directors, their related entities and our Group Companies may compete with us and have no obligation to direct any opportunities to us. While necessary procedures and practices may be adopted as permitted by law to address any instances of conflict of interest, if and when they may arise, we cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

20. Our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits and terrorism. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.

Our Company has obtained insurance coverage in respect of certain risks. Our insurance policies consist of Fire, Burglary and Vehicle and the details of the same are as under:

While we maintain insurance coverage in adequate amounts consistent with size of our business, some other insurances which the Company should have taken are Key man Policy for its Key Management Personnel, Group Personal Accident Insurance, Cash in transit insurance, Goods in transit insurance. Therefore, in the absence of the requisite insurance cover, in case any mishap happens, the Company may be subject to not only the operational losses but loss of goodwill also.

There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

21. *Our Promoters and members of the Promoter Group have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Our Promoters and members of the Promoter Group have provided personal guarantees in relation to certain loan facilities of Rs.1200 lakhs sanctioned to us as on September 30, 2023. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

22. *Our manufacturing unit is dependent on adequate and uninterrupted supply of electricity. Any shortage or non-availability of such essential utilities could lead to disruption in operations, higher operating cost and consequent decline in our operating margins.*

Our Company is heavily dependent on continuous supply of electricity which is critical for our manufacturing operations. While adequate power is available at the existing premises which is met through the electric supply by respective area electricity board and also company have installed 1 DG set for power backup which is taken on rental basis, we cannot assure you that these will be sufficient and, or that we will not face a shortage of electricity despite of these arrangements. Any shortage or non-availability of electricity could result in temporary shutdown of a part, or all, of our operations at the location experiencing such shortage. Such shut down if prolonged will have an adverse effect on our business operations and financial conditions. Moreover, if we are required to operate for extended periods of time on diesel generator sets our cost of operations would be higher during this period and would impact our profitability. Any failure on our part to obtain alternate sources of electricity, in timely manner, or, acceptable terms, may cause slowdown or interruption in production process and could have an adverse impact on our business, financial condition and result of operation. Further, any increase in electricity or fuel prices may result in increase in electricity and fuel expenses which may have an adverse impact on our business, financial conditions and result of operations.

23. *We are subject to strict quality requirements, regular inspections and audits and sale of product depends on our quality control and standards. Any failure to comply with quality standards may adversely affect our business prospects and financial performance, including cancellation of existing and future orders.*

We are the manufacturer of woman apparel. Manufacturing of women apparel goes through various quality checks at various stages including random sampling and quality check internally as well as by our customers. We need to comply with quality standards and failure of our product to meet quality standards may result in rejection or reworking of our product. This may result in our customers cancelling present or future orders of our product.

While we have put in place quality control procedures, we cannot assure that our products will always be able to satisfy our prescribed quality standards. Our quality control procedures may fail to test for all possible conditions of use or identify all defects in the manufacturing of our products. Any failure on our part to successfully maintain quality standards for our products may affect our business, financial condition and result of operations.

- 24. *We neither enter into any agreement with our customers nor do we have fixed customer base. There can be no assurance that we may get repeat order flows from our customers.***

Our business model is such that our sales are in the spot market and we do not enter into any long-term or fixed contracts with our customers. Further at present we also sell through online portals and supplies goods to e-commerce companies who further sell it to retail customers. These companies also order goods after evaluating the demand for our products. There can be no assurance that we shall get repeat order flows from our customers. While our brand is well known in the market and our qualitative supply at competitive prices shall ensure that we get sufficient orders, there can be no assurance that we shall be able to create sufficient demand for our products. Any contraction in our customer base or lack of orders may adversely affect our revenue from operations and consequently our profitability.

- 25. *Our sales and profitability could be harmed if we are unable to maintain or improve our brand image. Further any negative publicity with respect to our products could adversely affect our brand, business, financial condition and results of operations.***

We are operating under the brand "Signoria" which has significantly contributed to the success of our business. Our success depends on our ability to price the apparel against its quality and foresee, identify and respond to changing fashion trends in a timely manner. If we are unable to respond in a timely and appropriate manner to changing consumer demand and fail to price our apparels reasonably, our brand name and brand image may be impaired and may result in a significant decrease in net sales or leave us with a substantial amount of unsold inventory. In addition, any new products or brands that we introduce may not be successfully received by retailers and consumers. Although we have expanded, and expect to continue to spend significant resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brands will be effective in attracting and growing our customer base or that such efforts will be cost-effective. Further our brand may also be affected if there is any negative publicity associated with our products. Any failure to maintain and enhance our brands may negatively affect our business, financial condition and results of operations.

- 26. *Our manufacturing operations may be materially adversely affected by strikes; work stoppages or increased wage demands by our employees or any kind of dispute with our employees could adversely affect our business and results of operations.***

Our company is always exposed to risk of strike or any other industrial action which could have a negative impact on the smooth functioning of the operations. As on August 31, 2023, there are 22 full-time employees including workers at our manufacturing unit and we enjoy cordial relation with them but there is no assurance that we may not experience any kind of dispute or disruption with them such as strikes, work stoppages, or increased wage demand. Such events could disrupt our operations and may have a material adverse effect on our business.

Although we have not experienced any significant disruptions at any of our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in future. Our inability to effectively respond to such events, resolve such disruptions, in timely manner and at acceptable cost, could lead to slowdown or shutdown of our operations or the underutilization of our manufacturing facilities, which in turn may have an adverse effect on our business, financial condition and result of operation.

- 27. Our success largely depends upon the continuing services, strategic guidance and financial support of the promoters, directors and our senior management as well our ability to attract and retain skilled personnel. Any loss of our directors, senior management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and result of operations.**

Our success largely depends upon the knowledge and experience of our Promoters, Directors, our senior management as well as our ability to attract and retain skilled personnel. Any loss of our directors, senior management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial conditions and result of operations. We depend on the management skills and guidance of our promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Our future performance depends upon our ability to retain the continued services of our management team. If Promoters/Directors or any senior management employee is unwilling to continue in their present position, we may be unable to find a replacement easily, which would have an adverse impact on smooth functioning of the business.

In addition, we may require a lot of time to hire and train new personnel whenever a senior management employee discontinues their services with us. Also, this may attract increase in compensation level due to competition in the industry in order to attract and retain the skilled employees that our business demands. The loss of services of such senior management employees could have an adverse effect on our business, results of operations, cash flows and financial operations.

- 28. The occurrence of natural or man-made disasters or outbreak of global pandemics, such as the COVID- 19 pandemic, could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.**

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to who we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

- 29. Modernization and technology upgradation can render the existing technology and machinery redundant and obsolete.**

Change is inevitable and modernization and technology up gradation is essential to provide better services to customers. Any upgradation in technology would lead to existing machinery and technology becoming obsolete. This would require a lot of capital investment to implement new technologies or upgrade the machinery etc. The cost involved in upgradation and modernization would substantially affect our finances and operations. Also, the cost of implementing new processes would require substantial new capital expenditures and could adversely affect our business and financial condition.

- 30. The agreements governing our indebtedness contain conditions and restrictions on our operations, additional financing and capital structure.**

As of February 15, 2024, our total outstanding secured debt was of Rs. 1071.40 Lakhs i.e. Rs. 1066.78 Lakhs availed from HDFC Bank Limited for Term Loan and CC Limit and Rs. 4.62 Lakhs availed from Punjab National Bank for Car Loan.

Further, we have entered into borrowing facilities with HDFC Bank Limited up to Rs. 1200.00 Lakhs for working capital and with Punjab National Bank for Rs. 7.00 Lakhs for car loan. The financing agreements governing such facilities availed from HDFC Bank Limited include conditions and restrictive covenants that require us to obtain consents, no-objections or waivers from lenders prior to carrying out specified activities or entering into certain transactions, including, among other things, incurring additional debt, prepaying existing debt, declaring dividends or incurring capital expenditures beyond prescribed thresholds, amending our constitutional documents, changing our capital structure, shareholding pattern or management, and selling, transferring, leasing or disposing our encumbered assets

Although we have taken the consent of our HDFC Bank Limited on September 11, 2023 for undertaking activities in relation to our Initial Public Offering, undertaking any of the above without the consent of our lender or non-compliance with any of the covenants of our financing agreements, constitute default under the relevant financing agreements and will entitle HDFC Bank Limited to declare a default against us and enforce remedies under the terms of the financing agreements, that include, among others, acceleration in repayment of the amounts outstanding under the financing agreements, enforcement of any security interest created under the financing agreements and taking possession of the assets given as security in respect of the financing agreements. Further, we cannot assure you that we will be able to obtain approvals to undertake any of these activities as and when required or to comply with such covenants or other covenants in the future. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, we may be unable to pay its debts when they fall due.

For details of our borrowings, see “*Financial Indebtedness*” on page 244.

31. We depend on third parties for a major portion of our transportation needs. Any disruptions may affect our operations, business and financial condition.

We rely on third party transportation and other logistic facilities at every stage of our business activity including procurement of raw material from our suppliers and for transportation of our finish products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any transport service providers and engage them on a need basis. Additionally, availability of transport solutions in the market we operate in is typically fragmented. We rarely enter into written documentation in relation to the transportation services we hire which poses various additional risks including our inability to claim insurance. Further, the cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Freight expenses form an integral part of our manufacturing expenses. We are subject to the risk of increase in freight cost. Freight cost fluctuate with the prices of oil & gas. If we cannot offset any increase in freight cost, through increase in prices for our products, we would experience lower margins. The summary of transportation/ freight expenses based on the restated financial statement is given below:

	(₹ in Lakhs)			
Particulars	September 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Freight Expenses				
- Inward	1.26	2.56	3.53	2.47
- Outward	1.18	2.02	0.47	0.35
TOTAL	2.44	4.58	4.00	2.82

Note: Pursuant to the certificate dated February 21, 2024 issued by Statutory Auditor of the company, M/s Vinod Singhal & Co. LLP, Chartered Accountants.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-effective manner. Accordingly, our business is vulnerable to increased transportation costs including as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of weather related problems, strikes, lock-outs, accidents, inadequacies in road infrastructure or other events.

Although we have not experienced any disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may be cost inefficient, thereby affecting our operations and profitability.

32. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

33. *Within the parameters as mentioned in the chapter titled ‘Objects of the Issue’ beginning on page 91, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use Issue Proceeds towards Funding the Working Capital Requirements, General Corporate Purposes and to meet Issue expenses. We intend to deploy the Net Issue Proceeds in FY 2023-24. Such deployment is based on certain assumptions and strategy which our Company intends to implement in near future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “**Objects of the Issue**” beginning on page 91.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “**Objects of the Issue**” beginning on page 91, the Management of the Company will have significant flexibility in applying the proceeds received by our Company from the Issue.

Our Company proposes to deploy the entire Net Proceeds towards the objects for Working capital, General Corporate Purpose and issue expense during FY 2023-24. However, if the Net Proceeds are not completely utilised for the objects stated in Red Herring Prospectus due to factors such as (i) economic and business conditions; (ii) increased competition; (iii) market conditions outside the control of our Company and its management; and (iv) other commercial considerations such as availability of alternate financial resources, the same would be utilised (in part or full) in a subsequent period as may be determined by our Company in accordance with applicable law. For further detailson the use of the Issue Proceeds, please refer chapter titled “**Objects of the Issue**” beginning on page 91.

34. *Our inability to successfully implement some or all our business strategies in a timely manner or at all could have an adverse effect on our business. Further, our inability to effectively manage any of these issues may adversely affect our business growth and, as a result, impact our businesses, financial condition and result of operations.*

As part of our strategy aimed towards business growth and improvement of market position, we intend to implement several business strategies, which include:

- Expand our production capacities for woman apparel
- To build a global customer base and enter into new geographical markets
- Continue to focus on quality, environment, health and safety.
- To adopt a holistic approach in building 'our company' a brand in the woman apparel industry
- PAN India Presence and target potential export markets

For further information, see "**Business – Our Business Strategies**" on page 315.

Our strategies may not succeed due to various factors, including our inability to improve our production capacities, failure to meet market preferences and trends, failure to upgrade our infrastructure, machines, automation, equipment, and technology as required to cater to the requirement of changing demand and market preferences, our failure to maintain quality and consistency in our operations or to ensure scaling of our operations to correspond with our strategy and customer demand. Our inability to respond to regular competition, and other operational and management difficulties. Any failure on our part to implement our strategy due to many reasons as attributed aforesaid could be detrimental to our long-term business outlook and our growth prospects and may materially affect our business, financial condition and result of operations. For further details of our strategies, see "**Our Business**" on page 132.

Further, our ability to sustain growth depends primarily upon our ability to manage key issues such as our ability to sustain existing relationship with our clients, ability to obtain raw material at better prices, ability to compete effectively, ability to scaling of our operations, adhering to high quality and execution standards, our ability to expand our manufacturing capabilities, the effectiveness of our marketing initiatives, selecting and retaining skilled personnel. Sustained growth also puts pressure on our ability to effectively manage and control historical and emerging risks. Our inability to effectively manage any of these issues and implement our business strategies may adversely affect our business growth and, as a result, impact our businesses, financial condition and results of operations.

Further, there were instances of delayed filing of statutory forms under the Companies Act with the Registrar of Companies (RoC), which were subsequently rectified by paying additional fees. S. No.	Description of Form	Date of event	Due Date	Date of filing	Delay (No. of Days)	Reason for delay

Additionally, there have been instances of erroneous filings of statutory forms with RoC under the Companies Act by our Company for Form CHG-1 for modification of charge for takeover of loan from SIDBI to HDFC Bank Limited as reduction of limit from Rs. 12.00 cr. to Rs. 8.00 cr. while the charge should have been filed Rs. 12.00 Cr. The company has filed CHG-1 for modification of charge on October 06, 2023 and rectified the error.

Further, Board of Directors has passed the resolution on October 10, 2023 for allotment of 22,20,000 shares in ratio of 1:1 instead of 2:1 as per resolution passed by the Extra ordinary General Meeting held on October 09, 2023 and filed the Form PAS-3 with RoC on October 11, 2023. of Rs. 5 lakhs per month. The company has filed revised MR-1 on November 07, 2023 mentioning the correct amount.

As of now, our Company has not received any show cause notices or penalties from regulatory authorities concerning these inaccuracies, delays, and non-compliances. However, there is no assurance that such discrepancies will not occur in the future, and we may be subject to regulatory actions and penalties, which could adversely affect our business operations and financial position.

36. *Improper storage, processing and handling of materials and products may cause damage to our inventory leading to an adverse effect on our business, results of operations and cash flows.*

Our inventory primarily consists of materials and components used in our operations and products. Our materials, manufacturing processes and products are susceptible to damage or contamination if not appropriately stored, handled and processed, which may affect the quality of the finished product. In the event such damage or contamination is detected at the manufacturing facility or at our project sites during quality checks, we may have to suspend manufacturing activities, lower capacity utilizations and delay work at project sites, which could materially and adversely affect our business prospects and financial performance. Improper storage may also result in damage to our inventory due to adverse weather conditions or longer than usual storage periods, which may also require us to incur additional expenses in replacing that portion of the inventory and/ or incur additional expenses in maintenance and improvement of our storage infrastructure, which may adversely affect our profit margin.

Further, the quality of the raw materials used, microscopic impurities such as dust and other contaminants, difficulties in the manufacturing process or malfunctions of the equipment or facilities used can lower yields, cause quality control problems, interrupt production or result in loss of products.

37. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the floor price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Floor Price of the Price Band as may be decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter titled "*Summary of Issue Document*" and "*Capital Structure*" beginning on pages 22 and 76 respectively.

38. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "*Objects of the Issue*" beginning on page 91.

- 39. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.**

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 40. In addition to standard remuneration or benefits and reimbursement of expenses, our Promoters, Directors and key managerial personnel are interested in our Company to the extent of their shareholding, dividend entitlement and lease rent received, in our Company.**

Further, our Promoter, some of Directors, Key Managerial Personnel and Senior Management may also be interested to the extent of their shareholding, dividend entitlement in our Company. For details on interest of our Promoter, Directors and Key Managerial Personnel, see "**Capital Structure**", "**Our Management**" and "**Financial Statements as Restated**" on pages 76, 160 and 188, respectively.

- 41. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.**

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above ₹ 10,000 Lakhs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the Designated Stock Exchange and shall also simultaneously make the material deviations/ adverse comments of the audit committee public.

- 42. Our Promoters will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.**

After completion of the Issue, our Promoters will collectively own 70.00% of the Equity Shares. As a result, our Promoters will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 43. Industry information included in this Prospectus has been derived from publicly available industry reports and/or websites. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.**

Issue Specific Risks

44. Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors.

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchange. These measures are in place to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market based parameters such as high low price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. Securities are subject to GSM when its price is not commensurate with the financial health and fundamentals of the issuer. Specific parameters for GSM include net worth, net fixed assets, price to earning ratio, market capitalization and price to book value, among others.

Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

45. There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by designated stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 46. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 47. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

49. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

While our Company is required to complete Allotment pursuant to Issue within four working days from the Bid Closing date, events affecting the Bidders decision to invest in Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, result of operations or financial condition may arise between the date of submission of the Bid and allotment. Our Company may complete the allotment of Equity shares even if such events occur, and such events limit the Bidders ability to sell the Equity Shares allotted pursuant to the Issue or cause the trading price of Equity Shares to decline on listing.

51. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. EXTERNAL RISK

Industry Related Risks

52. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and the results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

53. A slowdown in economic growth in India could have an adverse effect on our business, results of operations, financial condition and cash flows.

Our performance and growth are, and will be, dependent to a large extent on the health of the Indian economy and consumption spending by households. Economic growth in India is affected by various factors including domestic consumption and savings, rate of inflation in India, balance of trade movements, and global economic uncertainty. Most of our assets and employees are located in India, and we intend to continue to develop and expand in India.

Our revenue is generated primarily from the sale of Kurtis. Consumption of these products has increased as a function of increased affluence and purchasing power of retail customers in India, which has been positively and materially affecting our operating results. Consequently, future changes in the Indian economy, especially the purchasing power of consumers, is expected to directly impact our revenues and results of operations.

Further, India has in the past experienced high rates of inflation. In addition, from time to time, the Government of India has taken measures to control inflation, which have included tightening monetary policy by raising interest rates, restricting the availability of credit and inhibiting economic growth.

Inflation, measures to combat inflation and public speculation about possible governmental actions to combat inflation have also contributed significantly to economic uncertainty in India and heightened volatility in the Indian capital markets. Periods of higher inflation may also slow the growth rate of the Indian economy and increase some of our costs and expenses. To the extent that the demand for our products decreases or costs and expenses increase, and we are not able to pass those increases in costs and expenses on to our customers, our operating margins and operating income may be adversely affected, which could have a material adverse effect on our business, financial condition and results of operations.

Other Risks

54. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.

As stated in the reports of the Auditor included in this Prospectus under chapter **“Financial Statements as restated”** beginning on page 188, the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus.

Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

55. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

For instance, in November 2016, the Government of India demonetized certain – high value denominations of currency. Trading and retail businesses in India were impacted for a limited period of time on account of such demonetization. Such businesses have subsequently needed to introduce additional point of sale instruments to improve their collection process.

The Government of India implemented a comprehensive national goods and service tax (“GST”) regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which will result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

56. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

57. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which our company operates contained in the Prospectus.*

While facts and other statistics in this Prospectus relating to India, the Indian economy and the industry in which our company operates has been based on various government publications and reports from government agencies that are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Our Industry*” beginning on page 115. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other

problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

58. Financial instability in Indian financial markets could adversely affect our Company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

59. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE Limited could adversely affect the trading price of the Equity Shares.

60. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

61. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the

RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

62. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

63. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

64. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

Note: Pursuant to the certificate dated February 21, 2024 issued by Statutory Auditor of the company, M/s Vinod Singhal & Co. LLP, Chartered Accountants.

The major reasons behind the increase in the working capital requirements of our company in the last 3 fiscal years and stub period are as follows:

1. Growth in Revenue and Expansion in Business Activities:

This high increase in the working capital requirements of our company was due to a constant increase in the revenue of our company for the past 3 financial years. The sales of our company were Rs. 585.23 Lakh in the FY 2020-2021 and the same increased to Rs. 1181.60 Lakhs in FY 2021-2022 and which further increased to Rs. 1,914.92 Lakh in the FY 2022-2023 leading to an increase in the revenue by Rs. 59 FY 2021-22 in comparison to FY 2020-21 and an increase in the revenue of our company by Rs. 733.32 Lakhs in FY 2022-23 in comparison to FY 2020-21. The revenue of our company has increased at a CAGR of 48.46% over the last 3 financial years.

The reason behind the increase in the revenue of our company has been due to increase in the production capacity of our company during FY 21-22. During the year our Company purchased and installed 105 more stitching machines from 25 stitching machines in FY 20-21 which caused increase in production capacity which yielded additional sales and revenue in FY 21-22 amounting to Rs 1181.60 lakhs.

The increase in the revenue of our company in FY 22-23 in comparison to Rs. FY 21-22 was Rs. 733.32 Lakhs which was majorly because we got large chunk of orders from new customers over Pan India after company has participated in Jaipur Fashion Expo-2023 Exhibition in Jaipur. We were also awarded Top 50 creators in IPF star award and has achieved record revenue of Rs 1,338.64 lakhs in the last quarter of FY 2023 immediately after participating in the above Expo in January 2023.

The expansion and increased business activities of our Company required higher levels of working capital to support larger sales volumes, increased production and a serve a larger customer base.

2. Extended Credit Terms:

Another key component of the working capital gap is the trade receivables of the company. Our company investment in the trade receivables for the last three financial years and stub period is continuously increasing. The trade receivables of our company were Rs. 184.32 Lakh in FY 2020-2021 which increased to Rs. 268.74 in FY 2021-2022 which were further increased to Rs. 1,145.24 Lakh in FY 2022-23. Our Company offered our customers more extended credit terms that lead to higher accounts receivable. While this attracted more customers for us, it also tied up cash that could have been used for other purposes and thus the working capital requirements of our Company increased.

3. Dynamic Industry Trends:

Our Company operates in the business of manufacturing women apparels like Kurtis, Tops, Co-ord sets etc. The apparel industry is very dynamic in nature i.e. the industry trends like different styles, colors, patterns etc. continuously changes, and our Company need to keep its operations updated with the trend and manufacture products accordingly to retain our

existing customers and pitch its products to the potential customers. To do this, we regularly need to manufacture clothes according to the trendy new designs and styles. Thus, to maintain the production of apparel according to the new trends and to maintain the inventory level thereof, we require higher working capital.

Basis of estimation of working capital requirement

On the basis of existing and estimated working capital requirement of our Company and assumptions for such working capital requirements, our Board pursuant to its resolution dated **November 24, 2023**, has approved the projected working capital requirements for FY 2023-24 and FY 2024-25 and the proposed funding of such working capital requirements as set forth below:

- (5) Trade payables holding period are calculated from purchase divided by trade payables.

Justifications for Holding Period levels:

Justifications for holding period level mentioned in the table above are provided below:

Particulars	Justification for Holding Levels
Inventories:	<p>Raw material: Our Company procures raw material which is essential for manufacturing the product. In FY 2020-21, 2021-22 and 2022-23, our Company maintained raw material inventory levels for 42 days, 33 days and 25 days respectively.</p> <p>For the period ended on September 30, 2023, holding period was increased to 47 days. Going forward the company aims at expansion of business. Large-scale production requires uninterrupted supply of raw material. To ensure minimum lead time and smooth functioning of production process holding period of 60 days is justified in FY 23-24 and FY 24-25.</p> <p>Work in Progress: For FY 2020-21, FY 2021-22 and FY 2022-23, work in progress inventory level has been maintained at 101 days, 99 days and 50 days respectively of cost of production. This is the average time for the work in progress as required by the company on account of the various processes undertaken to arrive at the finished products. For the period ended on September 30, 2023 holding period was increased to 95 days.</p> <p>In line with the new expansion strategy the stock of raw material is being held for 60 days, consequently work in progress holding period significantly reduces to 60 days which is justified. It will remarkably reduce turnaround time to conversion of ready Finished Goods stock. Thus, our work in progress holding levels is estimated to maintain the holding levels to 60 days of cost of production for FY 2023-24 and FY 2024-25.</p> <p>Finished Goods: In the FY 2020-21, FY 2021-22 and FY 2022-23, our Company maintained finished goods inventory levels for 127 days, 132 days and 39 days respectively. All the products manufactured by our Company are based on orders places by the customers and the finished goods are dispatched as and when they are packed. Since we do not belong to the retail sector, there is requirement to maintain large stock and thus, finished goods inventory levels are high. For the period ended on September 30, 2023, holding period is 48 days. The historical data for the company depicts holding period of over 100 days except for an exceptional holding of 39 days in FY 22-23. The company is confident of fast rotation of finished goods and hence holding period of 60 days is justified Thus, we estimate finished goods inventory days at similar levels to 60 days in FY 2023-24 and FY 2024-25.</p>
Trade Receivables	<p>Our company make sales to the customers on a credit as well as on cash basis. The total Trade Receivables for the Period ended September 30, 2023, and For the Fiscal Year ended on March 31, 2023, 2022 and 2021 were Rs. 999.36 Lakhs, Rs. 1,145.24 Lakhs, Rs. 268.74 Lakhs and Rs. 184.32 Lakhs respectively. The holding period of our Trade Receivables for the Period ended September 30, 2023, and For the Fiscal Year ended on March 31, 2023, 2022 and 2021 were 280 days, 215 days, 82 days and 113 days respectively. Our Company gives credit facility to its customers in the normal course of business. Our company made a major portion of its sales in the last quarter of FY 23 and thus resulting in high holding of trade receivables. We will introduce new credit policy to enable faster realization of trade receivables and have estimated the holding</p>

Particulars	Justification for Holding Levels
	level for trade receivables as 90 days in the FY 2023-24 and FY 2024-25.
Trade Payables	Our Company procures raw materials of grey fabric and running printed fabric and/or running dye fabric from our suppliers. Raw materials of grey fabric are raw, unprocessed, and unfinished woven fabric taken directly from a loom. At times, they also supply the primary raw material grey cloth and get the running fabric manufactured on job work basis. The Outstanding dues to trade payables for the period ended September 30, 2023, and for the Fiscal Year ended on March 31, 2023, 2022 and 2021 were Rs. 520.00 Lakhs, Rs. 550.03 Lakhs, Rs. 352.09 Lakhs and Rs. 247.17 Lakhs respectively. The holding period for our Trade Payables for the period ended September 30, 2023, and for the Fiscal Year 2023, 2022 and 2021 were 220 days, 227 days, 227 days, and 266 days respectively. Since our company has a shortage of working capital, we must procure the raw material for a higher credit period due to which we are not able to obtain any cash discounts from our suppliers so the cost of procurement of goods remains high. Thus, using the Net proceeds from the IPO, we will make faster payments to its suppliers wherein we will get the benefit of cash discounts and will also give them a higher negotiation power which will result in the reduction in the cost of procurement of goods. The estimated Trade Payables Holding period for the Fiscal Year ended on March 31, 2024, and 2025 are 14 days and 14 days respectively.

GLOBAL ECONOMIC OVERVIEW

GLOBAL PROSPECTS

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China. Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years. This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth.

A. Contributions to global growth

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking

turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year.

E. Model-based global CPI inflation projections

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024. That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than anticipated recovery in China, but subsequently retraced those gains. Agricultural prices have been easing on the back of good production prospects for most crops.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023.

However, the drag on activity from tighter monetary policy is increasingly apparent, particularly in more interest-rate-sensitive activities such as business and residential investment, including construction. Growth over the rest of 2023 is set to slow substantially as it is weighed down by the lagged and ongoing effects of monetary tightening, and more restrictive credit conditions. These factors are envisaged to continue to affect activity heading into next year, leaving global growth below previous projections. Notwithstanding a continued recovery in tourism, global trade growth is likewise expected to slow in view of the ongoing rotation of consumption toward services, which tend to be less trade-intensive. Fiscal policy is expected to have little net impact on global growth over the forecast horizon, with modest tightening in EMDEs generally offsetting support in advanced economies.

F. EMDE GDP per capita

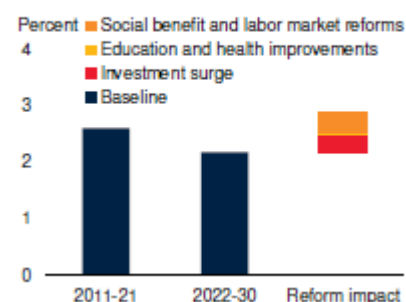

Growth in advanced economies is set to decelerate substantially for 2023 as a whole, to 0.7 percent, and to remain feeble in 2024, due to monetary tightening, less favourable credit conditions, softening labour markets, and still-high energy prices. In EMDEs, aggregate growth is projected to edge up to 4 percent in 2023, almost entirely due to a rebound in China following the removal of strict pandemic-related mobility restrictions. Excluding China, growth in EMDEs is set to slow substantially to 2.9 percent this year. This projection is predicated on the assumption of a protracted period of tight global monetary policy, fiscal consolidation in most EMDEs, and weak external demand. The slowdown is expected to be even more severe for EMDEs with elevated fiscal vulnerabilities and external financing needs. Persistent weak growth means that, excluding China, EMDEs are expected to continue making next to no progress at closing the differential in per capita incomes relative to advanced economies. By 2024, economic activity in EMDEs will still be about 5 percent below levels projected on the eve of the pandemic.

Global inflation is projected to gradually edge down as growth decelerates, labour demand in many economies softens, and commodity prices remain stable. The slow pace of improvement means that core inflation is expected to remain above central bank targets in many countries throughout 2024.

Risks to the outlook remain tilted to the downside. Recent advanced-economy bank turmoil highlights the possibility of more disorderly failures, which could lead to systemic banking crises and protracted economic downturns, with spillovers to sovereigns and across borders. These failures could be triggered by mounting concerns about balance sheet quality, continued losses in the heavily leveraged commercial real estate sector, or by the ongoing decline in house prices in many countries. Global inflation has been pushed higher by demand pressures, including those from the lagged effects of earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. In some countries, inflation has also been spurred by large currency depreciations relative to the U.S. dollar, as well as tight labour market conditions.

Many of the current challenges reflect underlying longer-run trends. Potential growth in EMDEs has been on a decades-long declining path because of slowing growth rates of labour force, investment, and productivity. The slowdown in these fundamental factors has been exacerbated by the overlapping shocks of the pandemic, Russia's invasion of Ukraine, and the sharp tightening of global monetary policy in response to high inflation. Reversing the decline in potential growth will require decisive structural reforms. These include measures to improve investment conditions, develop human capital and infrastructure, increase participation in the formal labour force, foster productivity growth in services, and promote international trade.

F. Global potential growth under reform scenarios

In particular, fostering investment in green energy and climate resilience can ensure that growth is both robust and sustainable.

GLOBAL RISK AND POLICY CHALLENGES

Soaring inflation reflects a combination of supply and demand factors, including large price increases for food and energy products priced in U.S. dollars. Inflation has risen particularly rapidly in poorer countries, partially due to the greater share of food in consumer spending. Relative to previous projections, global inflation is assumed to remain higher for longer. After peaking at 7.6 percent in 2022, global headline CPI inflation is expected to remain elevated at 5.2 percent in 2023 before easing to 3.2 percent in 2024, above its 2015-19 average of 2.3 percent. Risks to the growth outlook are tilted to the downside. In light of high inflation and repeated negative supply shocks, there is substantial uncertainty about the impact of central bank policy in terms of both magnitude and timing. As a result, the risk of policy missteps is elevated. Global inflation may be pushed higher by renewed supply disruptions, including to key commodities, and elevated core inflation may persist. To bring inflation under control, central banks may need to hike policy rates more than is currently expected. Financial stress among sovereigns, banks, and nonbank financial institutions may result from the combination of additional monetary tightening, softer growth, and falling confidence in an environment of elevated debt. Given already-weak global growth, a combination of sharper monetary policy tightening and financial stress could result in a more pronounced slowdown or even a global recession this

Global growth under different scenarios

year. Weaker-than-expected activity in China amid pandemic-related disruptions and stress in the real estate sector, rising geopolitical tensions and trade fragmentation, and climate change could also result in markedly slower growth.

Global interest rates and inflation under different scenarios

The weak global outlook and the heightened downside risks highlight the challenges facing policy makers around the world. Urgent action is needed to attenuate the risk of global recession stemming, in part, from the fastest and most synchronized monetary tightening in decades. As they focus on reducing record-high inflation, central banks in advanced economies and EMDEs need to take into account the possibility that cross-border spillovers from other monetary authorities' actions may tighten financial conditions more than expected. Discussions

among central banks can help mitigate risks associated with financial stability and avoid an excessive global economic slowdown in the pursuit of inflation objectives.

The international community needs to intensify its support to large numbers of displaced people and others affected by conflict or food insecurity, particularly in LICs. In responding to food and energy shocks, governments need to avoid imposing export restrictions and instead attenuate the impact on the poor through support measures targeted at low-income groups. The international community also needs to reduce the risk of debt crises in EMDEs, including by supporting timely debt restructuring. Given the rising human and economic costs of more frequent climate-related disasters, particularly in small states, speedy action to foster the energy transition is critical for mitigating climate change.

Global efforts need to be complemented by decisive policy action at the national level. While monetary policy cycles are peaking in some EMDEs, further tightening may be needed in others to rein in inflation. Financial stability risks stoked by global and domestic policy tightening can be mitigated by strengthening macroprudential regulation and promptly addressing financial vulnerabilities such as rising nonperforming loans.

GLOBAL TRADE

Global trade growth decelerated in the second half of 2022, in tandem with deteriorating activity in major economies. Weakening trade mirrored the slowdown in global industrial production, as demand shifted toward its pre-pandemic composition and away from goods. Despite this moderation, goods trade surpassed pre-pandemic levels last year; meanwhile, services trade continued to recover, supported by the gradual shift in demand toward services. Tourism flows rebounded as many countries eased travel restrictions but remained well below pre-pandemic levels and uneven across regions (WTO 2022).

Although global supply chain pressures are still above pre-pandemic levels, they have eased since mid-2022, as reflected in lower transportation costs and normalization of inventories. Weakening demand for goods is expected to reduce these pressures further in 2023.

After softening to 4 percent in 2022, global trade growth is expected to decelerate further to 1.6 percent in 2023, largely reflecting weakening global demand. Trade is envisaged to be particularly subdued in EMDEs with strong trade linkages to major economies where demand is expected to slow sharply. In all, the current post-recession rebound in global trade is on course to be among the weakest on record. Travel and tourism are expected to pick up further but will be constrained

by slower global activity and high input costs. Goods trade is expected to moderate owing to subdued demand and a gradual shift in consumption toward services.

(Source: <https://www.worldbank.org/en/publication/global-economic-prospects>)

GLOBAL INFLATION

Inflation rose throughout 2022 in almost all economies. Median global headline inflation exceeded 9 percent in the second half of the year, its highest level since 1995. Inflation reached almost 10 percent in EMDEs, its highest level since 2008, and in advanced economies just over 9 percent, the highest since 1982. Inflation was above target in virtually all countries that have adopted inflation targeting.

Soaring inflation in 2022 reflected a combination of demand and supply factors. On the demand side, the acceleration of growth during the initial rebound from the 2020 global recession, as well as the lagged effects of earlier macroeconomic support, contributed to persistent price pressures. Price increases were particularly large in sectors such as shipping and air travel, where compositional shifts in demand encountered ongoing capacity constraints and supply chain. On the supply side, shortages of key commodities, exacerbated by Russia's invasion of Ukraine, contributed substantially to higher energy and food prices. In some countries, tight conditions and mismatches in labour markets further added to rising wages and higher input and production costs. Finally, many countries experienced large currency depreciations that passed through into higher import, producer, and consumer prices. The higher share of food in consumer spending has caused inflation to accelerate more in low-income countries compared to other EMDEs.

Inflation has risen across a broad range of goods and services. Global core inflation has risen markedly, reaching over 6 percent late last year, its highest level since 1992. As a result, short-term (one-year-ahead) inflation expectations have risen in most economies. In contrast, long-term (five year-ahead) inflation expectations have been relatively more stable, edging up by only about 0.15 percentage point in both advanced economies and EMDEs since the onset of the pandemic. This stability may reflect the credibility of the commitment of most central banks to confront inflation, reinforced by recent policy tightening.

Inflationary pressures started to abate toward the end of 2022, reflecting weakening demand and easing commodity prices. The share of countries where inflation is accelerating is trending down. In the face of substantial monetary tightening, slowing activity, easing supply chain disruptions, and moderating prices for many nonenergy commodities, both core and headline inflation are expected to decline over the forecast horizon. In many countries, however, high core inflation has been unexpectedly persistent, suggesting that global inflation will remain elevated for longer than previously envisaged.

(Source: <https://www.worldbank.org/en/publication/global-economic-prospects>)

FINANCIAL DEVELOPMENTS

Global financial conditions have tightened sharply, with risk appetite dampened by slowing global growth, persistently elevated inflation, and faster-than-expected monetary tightening. Long-term government bond yields in the United States and Germany increased at their fastest pace in nearly three decades in 2022, reaching their highest levels since 2007 and 2011, respectively, in October. In the United Kingdom, a sharp deterioration in liquidity related to collateral calls on pension fund derivative positions prompted central bank intervention in gilt markets for financial stability purposes. Equity markets worldwide saw substantial declines—by December, the MSCI World equity index had declined nearly 20 percent since the start of the year, with equity market indexes down more than 15 percent (in U.S. dollar terms) in about half of countries.

As in past tightening episodes, tighter monetary policy in advanced economies weighed on EMDE capital flows. China experienced sizable debt market outflows in 2022, while other EMDEs remained in a protracted period of generally weak debt and equity flows that started in 2021. The U.S. dollar also appreciated markedly in 2022, by about 14 percent on a GDP-weighted basis by October, before moderating somewhat later in the year. Most EMDE currencies depreciated against the U.S. dollar, but economies with fiscal deficits greater than 3 percent of GDP saw eight times more depreciation, on average, than other EMDEs.

RECENT DEVELOPMENTS AND OUTLOOK

Conditions in advanced economies have deteriorated sharply since mid-2022 amid high inflation, rapid monetary tightening, reduced fiscal support, and major energy disruptions in Europe. The monetary tightening cycle and continued energy supply pressures are projected to slow growth further in 2023, especially in the euro area. In China, activity weakened last year and remains vulnerable to a prolonged drag from the real estate sector and continued pandemic-related disruptions.

The outlook for EMDEs has deteriorated markedly due to tighter financial conditions and weaker external demand. High inflation, monetary policy tightening, and adverse effects from the Russian Federation's invasion of Ukraine are expected to weigh on EMDE activity. LICs are being particularly affected by high prices and shortages of food.

INDIAN ECONOMIC OVERVIEW

INTRODUCTION

Share of economies with rising inflation

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Exhibit 3.1: Growth Projections of Women Apparel Market (in INR Cr) – FY 2015, FY 2020, FY 2021, FY 2025P

Source: Technopak Analysis

The women apparel market is expected to grow from INR 1,63,291 Cr (US\$ 21.8 Bn) in FY 2020 to INR 2,53,733 Cr (US\$ 33.8 Bn) by the end of FY 2025. It is expected to be the fastest growing segment in the apparel market in India, with a forecasted growth rate of 9.2% between FY 2020 and FY 2025. Exhibit 3.2: Share of Organized and Unorganized Retail as a percentage of Women Apparel Market (in INR Cr) – FY 2015, 2020, 2021, 2025P

Source: Technopak Analysis

Historically, consumption of women’s apparel was centred around the informal market through standalone boutiques selling unbranded products and the sale of unstitched fabrics, allowing women to use tailors to create their desired garments through made-to-measure services. The share of organised retail in women apparel which was 19% in FY 2015 increased to 27% in FY 2020 and is expected to reach 42% by FY 2025. Emergence of Multi-channel organized retail (EBOs, LFS/MBO, Value Retail, E-commerce) and scale of organized players that have now emerged as Pan India Players (Biba, Fabindia, Reliance Trends, Trent Westside, ABFRL) have managed to address the consumer demands better over unorganized segment enabling this transition in favour of organized retail in WomenApparel sector.

Segmentation of Women Apparel Market

Women Indian wear is the dominant segment within women apparel market in India and the preferred form of apparel for approximately 71% of the market (FY 2020). Despite having a high current share, the share of Indian wear in the overall Women apparel segment will continue to be resilient in future. The high share of Indian wear in the total apparel is a unique feature of apparel market in India. In any other major apparel markets (China, Japan, Southeast Asia etc.) nearly the entire apparel category is made up of western wear. Therefore, Indian fashion is influenced by Indian ethos and values which impact the apparel’s cut, shape, silhouette and nature of raw material used (not restricted to power loom but also extends to handlooms fabrics). In this context,

the Indian women apparel industry’s categorization into Indian wear and western wear is significant given the Indian wear category’s size and its unique existence compared to other major markets.

Impact of COVID-19

Apparel and Lifestyle sector has been one of the hardest hit sectors during the COVID induced lockdown since March of 2020 that impacted whole of FY 2021 in form of nationwide or regional lockdowns. First two months of FY 2022 also saw the second wave of COVID that caused unfortunate damage to life & businesses leading to hardships on many fronts. However, June 2021 onwards there was recovery in business and revival of consumer sentiment. Consumers started moving out of home for leisure and work, which led to an increase in merchandise shopping. Diwali 2021 saw consumer spending worth INR 1.25 lakh Crores, which was the highest in a decade for the same period.

Brands and consumers alike have adapted to the changes due to COVID, while business cycles come back to normalcy. E-commerce saw a major boost with consumers taking it as a means of ordering merchandise both across need and aspiration-based categories. COVID-19 gave impetus to the growth of e-commerce that is expected to become a significant growth driver for the organised market.

The women apparel industry saw a decrease in formal wear due to COVID-19, but also witnessed increase sales of casual wear driven by work from home and awareness towards wellness due to the pandemic, and hence active wear gained traction during this period. The sleepwear, loungewear and athleisure categories saw rise in sales, alongwith fusion wear that works as both formal/ smart casual and comfort wear. Marks & Spencer's and Shoppers Stop added a separate section offering loungewear. Online majors like Amazon India and Myntra expanded offerings for comfort-wear. Indian Wear brand Biba launched its range of sleepwear and loungewear to cater to the consumers seeking comfort wear mixed with smart casuals, along with more offerings in comfortable fusion wear such as kurtis, palazzos, pants etc.

Women Indian Wear Market

In this context, the Indian women apparel industry's categorization into Indian wear and western wear is significant given the Indian wear category's size and its unique existence compared to other major markets. The broad categorization of Indian and western comprise many sub-categories. The women Indian wear category can broadly be classified into Saree & others (includes Indian dresses, Lehenga etc.) and SKD (including Sets, Mix & Match, Dupattas. Stoles

etc.). It also comprises of fusion wear, which is an amalgamation of other cultural influences on Indian wear.

The women's apparel market in India has evolved from traditional apparel such as sarees to a two-piece market, dominated by 'Salwar Kameez Dupattas' and Mix & Match wear, and was estimated at US\$ 21.8 Bn, or 36%, of the total apparel market in India as of financial year 2020. Women Indian wear has rapidly transitioned towards contemporisation driven by trends like fusion wear. This transition is led by Indian EBO led brands who are creating trends and capturing consumer mind share. This is making them stay ahead on fashion curve and emerge as fashion forward category leaders that can both charge premium and lead the mid to premium price bands. These EBO led brands comprise home grown Indian, fusion brands like Biba, W & Fabindia. Their current size now signifies brand stickiness and entry barriers for others. New entrants in this space are increasingly referenced by the consumers with these brands (Viz. Biba Size, Fabindia fabric, W's print). Value segment brands also refer to them for trends and look up to them as fashion leaders. In this backdrop, branded market of Women Indian Wear has evolved in the past decade and is currently dominated by 'fashion forward' and 'fashion follower' retail brands.

Fashion Forward brands such as Biba, Fabindia, Anokhi, W etc. follow a 3-month cycle time for designs constructed from scratch for every season and generate an average of ~35-50% of their revenue from exclusive brand outlets (EBOs) and can go as high as 80-90% of revenue. Biba, which was launched in 1986, is one of the first national brands in the Indian wear segment. It also has a rich legacy of stores with a large online presence. Biba has emerged as one of the Category Creators within the Indian women apparel segment and has since evolved into one of the largest & leading lifestyle brands with a ~4% market share in the branded women's Indian wear market (excluding Sarees) in India for FY 2020.

Fashion follower brands such as Soch, Jashn, Meena Bazaar etc., take design inspiration from vendors, fashion forward brands, celebrity fashion and commercialize their product offerings. This allows them flexible lead times (about 45-60 days from design selection to store) but limits their ability to command a price premium. In the case of fashion followers like Soch more than 70-75% of the sale comes from EBOs and the balance is contributed by LFS, MBOs and online, with online contributing close to 12-15%.

Indian wear category offers a unique blend of comfort and fashion to the consumer making it the preferred apparel for most occasions. The category association revolves around comfort, 'contemporisation' as well as relevance of the occasion. Whilst the consumers in Tier I cities, compared to the metro-centric consumers, tended to be strongly governed by traditional usage of the saree, the Indian wear category is increasingly becoming the category sought for as it offers both conformity and style. Indian women wear in the form of Kurtis, Mix & Match, Saree, Indian dresses etc has found a universal appeal across states as these categories are being worn by women across the country. With increased online presence and social media marketing, consumers across have become aware of, and have adopted various Indian & Fusion wear apparel like Kurtis, sets, palazzos, dhoti, Indian jackets, saree etc.

Indian apparel fashion is uniquely an India focused opportunity and one that provides a natural and sustainable advantage to homegrown players to seize it. This advantage is reflected in structure of the Indian wear

MANUFACTURING PROCESS

The process of manufacturing is explained through the following flow chart:

The manufacturing process from designing to cutting is undertaken in the manufacturing facility I situated at 324, Ayekar Nagar II, Near RICCO Industrial Area, Mansarovar, Jaipur, Rajasthan – 302020, India and manufacturing process from sewing to Product Distribution is undertaken at manufacturing facility II situated at H1-74, RIICO Industrial Area, Mansarovar, Jaipur. Brief outline of the manufacturing process is outlined as under:

The manufacturing process carried out in Manufacturing Unit I:

Designing

Design is the most important part in the fashion industry being beginning we have to decide about design after that further process started. Our Company has its own design studio and the team comprises of young, energetic and creative professionals who ensure that our products are in compliance with industry standards and the latest trend. We specialize in and design ethnic apparel as the culture and tradition is mirror of a country. We have total number of 958 designs for the year ended March 31, 2023, total number of 737 design for the year ended March 31, 2022, and total number of 430 design for the year ended March 31, 2021. In line with the manufacturing process laid down by us, initially a product sample is produced according to the specifications provided by our Company. This sample is then approved before going into further stage of production.

Procurement

The raw material required for manufacturing of our products is running printed fabric and/or running dye fabric, depending upon design of the product. We procure raw material either directly from supplier or get it done on job work basis. Our some of raw material requirement is met through supplies from our Group Company. All apparent and intricate corrections are made in the product sample so as to make it free from errors.

Layering:

Spreading is the process of laying fabric layers on a table, one on top of another so as to form a “lay”. The fabric from the stores is issued to the cutting room daily in advance which is stored in the rack provided next to the cutting tables. The fabric rolls are loaded on to the roll holders. The tailor prepares a size and design on a standard paper to avoid the errors occurred while cutting the fabric. Once the standard paper is ready the same is placed over the layered fabric to mark the design with marking pens and even chalks such that tailors much rely on this marking to do the job.

Cutting:

After spreading, layers are cut with the help of straight knife cutting machines and end cutters. In order to cut across on such a wide table, a mobile cutting machine guiding rail is used. This rail is a “mobile” guide that is used along with a straight knife cutting machine having a foldable handle bar. It is then cut into the pattern that will identify points in a garment. A Fabric Cutting Machine is used to cut materials. This machine helps in neat cutting with low, noise and high efficiency. It provides maximum productivity with minimal fatigue.

The manufacturing process carried out in Manufacturing Unit II:

Sewing:

The fabrics are now ready to be stitched. The sewn parts of the fabric, such as sleeves, etc. are assembled together to give the final form to the clothing.

Finishing and Inspection:

Company attaches utmost importance to the quality of our final product. Hence it is ensured that each garment is individually checked and ensured that it is free from any defects. It is ensured that every piece which is manufactured is as per the required quality standards. Our quality assurance and control team is responsible for ensuring that all finished goods are free from defects and are

manufactured as per the specified measurements. Any product having variation beyond acceptable limits is rejected. Finishing of products involves removal of loose and unwanted threads, proper and customized ironing. The quality assurance and control team carries out frequent checks on the process and product specifications. The finished products are stacked in cartons and are sent to the stockroom facility for labeling, packaging and insert cards.

Steam Ironing

After inspection the garments are checked for loose threads, stains etc. Thereafter these garments are sent for ironing.

Labeling and Packing:

Labeling is done according to the brands to each of our products and as per the specifications provided by the merchandising team in our stockroom. Care is taken to make the decent packaging and it also protects the products from damage. The finished products are now ready for dispatch and distribution.

Product Distribution

The finished products after labeling are packed into cartons for further distribution to the customers. The work is given to our dispatch team, to ensure that products flow directly to the customers in a timely and cost efficient manner. The responsibility of the dispatch team includes inventory management and supply chain management. We use third party carrier services to deliver our products to customers.

The Government of India has consolidated 29 central Labour laws into four Codes namely Code of Wages 2019, The Code on Social Security, 2020, The Industrial Relations Code, 2020 and Occupational Safety, Health and Working Conditions Code, 2020. All these codes have received the assent of President of India but none of them has been made effective till date. Brief descriptions of each of the codes are given below:

Code of Wages, 2019

The Code aims to consolidate the laws relating to wages and bonus and matters connected therewith or incidental thereto. It received the assent of President of India on August 08, 2019. The Code contains procedure for fixing minimum wage, limit for fines and deductions in wages, minimum and maximum bonus, calculation of allocable and available surplus, as well as gender neutral consideration in fixing wages. The Code has given the power to Central Government to fix a "floor wage" and the State governments cannot fix any minimum wage less than the "floor wage". It amalgamates and subsumes four imperative labour laws - the Payment of Wages Act, 1936; the Minimum Wages Act, 1948; the Payment of Bonus Act, 1965 and the Equal Remuneration Act, 1976. The date of implementation of the Code is yet to be notified.

The Code on Social Security, 2020

This Code received the assent of President of India on September 28, 2020 though the implementation of the same is yet to be notified. The Code aims to provide better social security benefits such as provident fund, insurance and gratuity to workers. It extends the reach of the Employees' State Insurance Corporation and the Employees' Provident Fund Organization (which regulate benefits such as provident fund, insurance, pension, etc.) to the workers in the unorganized sector and the platform and gig workers. The Code further stipulates gratuity benefit for fixed term employees without any condition for minimum service period as envisaged under the current regime. The Code subsumes nine (9) labour laws relating to social security, namely, the Employees' Compensation Act, 1923, the Employees' State Insurance Act, 1948, the Employees'

Provident Funds and Miscellaneous Provisions Act, 1952, the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959, the Maternity Benefit Act, 1961, the Payment of Gratuity Act, 1972, the Cine-Workers Welfare Fund Act, 1981, the Building and Other Construction Workers' Welfare Cess Act, 1996 and the Unorganized Workers Social Security Act, 2008.

The Industrial Relations Code, 2020

This Code received the assent of President of India on September 28, 2020 though the implementation of the same is yet to be notified. The Code aims to streamline the laws regulating industrial disputes and trade unions in India. For the benefit of the employers, the Code has introduced various aspects such as increasing the threshold of workers to three hundred (300) for obtaining the consent of the concerned government in case of lay off, retrenchment or closure of the establishment, notice of change not required to be given subject to the conditions stipulated in the Code, increasing the wage threshold to INR 18,000 (Indian Rupees Eighteen Thousand) for exclusion from the definition of worker, etc. The Industrial Relations Code also introduces the concept of deemed certification of standing orders. The Code subsumes three labour laws relating to industrial relations, namely, the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946 and the Industrial Disputes Act, 1947.

Occupational Safety, Health and Working Conditions Code, 2020

The Occupational Safety, Health and Working Conditions Code, 2020 (OSH Code) is one of three new labor codes that will consolidate the bulk of labor legislation in India and streamline labor compliance besides expanding the social security net for workers. This Code received the assent of President of India on September 28, 2020 though the implementation of the same is yet to be notified. Rules to implement the Code are expected to be finalized in the next few weeks.

New establishments covered by the OSH Code must register themselves (within 60 days of commencement of the Code) with registering officers appointed by the appropriate government. Establishments already registered under any other federal law will not be required to register again. Every employer is directed to undertake the following obligations by the OSH Code:

The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 ("SHWW Act")

The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 provides for the protection of women at work place and prevention of sexual harassment at work place. KEY FACTORS THAT MAY AFFECT OUR RESULTS OF OPERATION

Our results of operations have been, and will be, affected by many factors, some of which are beyond our control. Our results of operations and financial conditions are affected by numerous factors including the following:

Ability to expand the customer base and device new marketing strategies to create brand awareness thereby increasing the margins on sales.

Customer relationship is the core of our business. Our ability to grow our operations and increase sales depends upon the brand awareness of our products among the end consumers. We expect that our revenue growth will be primarily driven by the use of our products by the end consumers. This will drive demand for our products by the end consumers by switching from their regular brand to our brand.

Our product mix mainly comprises of ladies Kurti, Pant & Dupatta, Kurti & Pant, Kurti, Gowns, Cord Set and ladies Top. The clothing is more than just a necessity, it's a statement of style and personality. That's why we offer a wide selection of fashionable and comfortable clothing for women that are perfectly for any occasion. There has been a high demand for ethnic wear of various countries across the world because of globalization, movement of culture and tradition in conjunction with individuals visiting and staying in numerous countries.

We have substantial opportunity to grow our customer base. We have invested, and intend to continue to invest, in order to drive sales to new customers. In particular, we have made, and plan to continue to make, investments to enhance the expertise of our sales and marketing segment. Our business from existing customers has steadily grown and contributed a significant portion of our revenue in a very short period. Our ability to establish and strengthen customer relationships and expand the scope of our products and services will be an important factor for our future growth and our ability to continue increasing our profitability.

Leveraging on our present portfolio of customers and expertise in the verticals of our existing customers we aim to develop new customer relationships by identifying potential customers that operate within the same verticals as our existing customers. In addition, if we can generate healthy demand for our products, we may be able to increase our price, which would consequently lead to an increase in our revenues and profit margins. Conversely, if we are unable to provide latest designer products to our customers, either at all or at an acceptable price, or if our customers are dissatisfied with our product and services for any other reason, it would have an adverse effect on our revenues and our profits.

Cost of materials consumed

Our ability to remain competitive and profitable depends on our ability to source and maintain a stable and sufficient supply of raw materials at cost effective prices. Prices of grey cloth and printed fabric are gradually increasing which has had a significant impact on our gross margins. We purchase 45% of raw materials from top five suppliers and 52% from top 10 suppliers. (2022-2023)

We depend on external suppliers for our raw material and accessories required and typically purchase materials and accessories on a purchase order basis and place such orders with them in advance on the basis of our anticipated requirements.

As a result, the success of our business is significantly dependent on maintaining good relationships with suppliers. For further information on procurement of our raw materials, see ***“Our Business – Raw Materials”***.

Pricing and margin on our products and revenue mix

The rates we charge for our products are a key factor impacting our gross profit margins and profitability. These vary by the use of grey cloth, running cotton printed fabric, type of printing. The margin on our products is impacted by the increase in our costs in providing those products, which is influenced by purchase price of grey cloth, running cotton printed fabric and accessories. As customer relationship matures and deepens, we seek to maximize our revenues and profitability by expanding the scope of products offered to that customer and winning higher profit margin. Further we intend to become a preferred supplier for our dealers to enhance the distribution reach of our products and thereby increasing our revenue. We sell 54% of total sales to Top five customers and 66% to top Ten customers. (2022-2023)

Increasing competition in the industry.

The market for manufacturing and trading of ladies’ garments that we operate is highly competitive and unorganized and we expect competition to persist and intensify. The principal competitive factors in our markets are brand reputation and good track record, consistency in quality of the products offered, ability to address customer’s timing requirements and price. Success of our operations depends on our ability to effectively compete by continuing to differentiate our brand and products from our competitors by maintaining our brand perception centered around quality which is at par with top producers and sellers of ladies’ garments in the country. Further, to ensure higher volume of sales we follow price below competition strategy wherein we provide our garments with quality equivalent to top manufacturers and sellers in the country at prices below the market price. Our commitment to quality is evident in every piece of clothing we offer. we manufacture to ensure that all of our products are made with the finest materials and the highest level of craftsmanship. In addition to our wide range of clothing options, we also pride ourselves on providing excellent customer service. Any increase in the competition in our industry is likely to adversely impact our market share, margins and profitability.

Reliance on relatively few products.

Our target audience is women who appreciate both traditional and ethnic styles and modern fashion, we cater to those who are looking for clothing that is comfortable, stylish and economical. Our clothes are perfect for women who want to make a statement and stand out from the crowd. Majority of our revenues are derived from Ladies Kurti, pant & dupatta portfolio. Our sales comprise of Business-to-business (B2B) which are at prevailing market price. However, in the event that our customers do not renew or otherwise agree to new fixed sales contracts, but instead rely on purchase orders to govern the volume and other terms of sales of products, or there is any failure to retain such customers on terms that are commercially viable, or there is any decrease in orders from a major customer or a

significant portion of our customers for our products, or there are any defaults or delays in payments by a major customer or a significant portion of our customers, our business, financial condition and results of operations could be materially and adversely affected.

Sales & marketing.

Kurti business in India can be profitable and rewarding venture especially if you have a passion for fashion and design. Kurti is traditional Indian wear that has gained immense popularity in recent years, both within and outside India. India is currently the largest exporter of ladies kurti in the world, India accounted for 86916 shipments followed by Pakistan 1065 shipments and China with 58 shipments. India is exporting maximum kurti to countries like Mauritius, UAE and Malaysia. (Source: Dial 4 trade issue)

The demand for clothing items is ever present and the consumer purchasing power continues to grow each year. Consumers are now spending more on trendy and fashionable clothing which needs to be produced every season.

To develop an effective sales plan, it is important to define revenue goals for a specific time frame, optimize team performance and lead sales & marketing team from front. A solid marketing strategy is crucial for success of kurti business, we have recently launched our updated version of website and presented latest design of Kurti and other products. We had also participated in Kolkata fashion Expo exhibition 2022 and received award of Top 50 Creators and thereafter received good sale orders in the last quarter of fiscal 2022-23.

We have now started selling our products online, actions are being taken to sell online on B2B e-commerce on you-tube platform, this platform allows us to connect with B2B buyers both locally and globally giving option to export from the outset.

However, we may not be successful in expanding our network or increase our market presence with limited availability of finance, further we may also face disruptions in selling our products for various reasons such as transport bottlenecks, raw materials inaccessibility, competition activities, labour issues, natural disasters, absence of professional and technical expertise etc. which may result in disruption to our business.

Changes in fiscal, economic or political conditions in India

We are incorporated in India and we conduct our corporate affairs and our business from India. Consequently, our business operations, financial performance and the market price of our Equity Shares are affected by interest rates, government policies, taxation, social and other political and economic developments affecting India.

One challenge that designer ladies garment industry faces is the fast-changing fashion among women, Today's Youth avoid to repeat their designer clothes after wearing once.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition along with the price of the Equity Shares.

For more information on these and other factors / development which have or may affect us, please refer to chapters titled *"Risk Factors"*, *"Our Industry"* and *"Our Business"* beginning on page 29, 115 and 132 respectively.

Revenue from Operations

(₹ in Lakhs)		
2021-22	2020-21	Variance in %
1181.60	585.23	101.90%

During the financial year 2021-22, the revenue from operations of our company increased to Rs. 1181.60 Lakhs as against Rs. 585.23 Lakhs in the year 2020-21. This increase was primarily due to PAN India pent up demand.

The reasons behind the increase in the revenue from Rs. 5.88 crores in FY 2021 to Rs. 11.81 crores in FY 2022 are as follows:

1. Relaxations in Covid restrictions:

After gradual relaxations in covid restrictions business saw gradual recovery from July 21 and consumers sentiments improved and the consumers started moving out of home which led to increase in merchandise shopping of women apparel.

2. Increase in the number of machines installed:

During FY 21-22 we have purchased and installed 105 more stitching machines from 25 stitching machines in FY 20-21 which caused increase in production/ sales and revenue in FY 21-22 to Rs 1181.60 lakhs.

3. Fashion Trends and Innovations:

Our Company stays updated of current fashion trends and offering innovative designs that relate with the target audience and can attract more customers. We keep introducing new styles and collections regularly that keeps the product range fresh and appealing.

4. Expansion in new territories and effective marketing strategy:

Our company expanded the business by entering into new markets which opened up new revenue streams. By understanding and adapting to the preferences and cultural shades of different markets, we have increased our revenue year on year.

5. Increase in the Products Offered by our Company:

Our Company has diversified itself by introducing new range of products from time to time according to the needs and preferences of the customers.

The PAT of our Company increased from Rs. 32.60 lakhs in FY 21 to Rs. 67.53 lakhs in FY 22 due to increased production and sales in FY 21-22 revenue & PAT of our company has increased, as we could produce total 3,64,420 pieces of women apparels in FY 21-22 as against 1,35,977 pieces in FY 20-21.

Our Company earned total revenue from operations in FY 21 was Rs. 585.23 Lakhs and the total revenue earned in FY 22 was Rs. 1,181.60 Lakhs which accounts as an increase of 101.90% on a year-on-year basis. The PAT of our Company stood at Rs. 32.60 Lakhs for the FY 21 and was RS. 67.53 Lakhs in FY 22 which was an increase of 107.14% on a year-on-year basis.

The increase in the revenue of our Company was due to the increase in the volume of goods sold along with the new customers onboarded during FY 22. The details of which are as follows:

Details	FY 2021-22	FY 2020-21
Number of Kurtis Sold ("in units")	2,23,000	1,12,000
New Customers Onboarded	127	189

As shown in the table above, our Company witnessed a substantial increase in the volume of products sold during FY 22 which was 2,23,000 units, having an increase of 99.11% as compared to the volume of products sold in FY 21. This, along with the expanding customer base of our company, was the reason behind an increase in the revenue.

As we are involved in the manufacturing of Kurtis and in this kind of business the major part of the cost for the manufacturing process is variable cost. Further the Fixed cost remains same even if the production is increased. With the additional sales the gross profit of our company will increase with the increase in revenue of our Company. Since fixed costs remain constant while producing more units, the portion of fixed costs per unit decreases, leading to a lower Cost per unit. As the fixed cost per unit decreases with increased production, the gross profit tends to increase PAT of our company because a larger portion of the revenue contributes to covering variable costs and ultimately the profit of our Company will increase with the increase in the revenue of our Company.

Throughout both FY 2021-22 and FY 2020-21, we maintained a PAT margin of 5.72% and 5.57%, respectively, indicating a negligible change in operational margins on which our company operated and thus the reason behind the increase in PAT in FY 22 was due to the increase in the revenue of our Company.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment Mechanism, the SEBI UPI Circular have introduced the UPI Mechanism in three phases in the following manner:

- **Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the ASBA Form with any of the designated intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continue to be six Working Days.
- **Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI, vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the ASBA Form by UPI Bidders through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20/- to Rs. 24/- per share, Issue size of 3,000 Equity Shares and receipt of five Bid from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Applied Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, the FDI Policy, FEMA and rules and regulations made thereunder. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the RBI and the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”).

The Government has from time to time made policy pronouncements on FDI through press notes and press releases.
